COMMENTS:

I met with the facility contact, Brian Phu, the responsible official, Mr. Cuong Van Phu was not present at the shop at this time.

- I observed the dryers were not in operation at this time. There were no Perc odors detected during the observation of the facility. The equipment appeared to be in good condition; no leaks were observed, during the check with the Halogen leak detector.
- Brian Phu obtained the calendar records, from the responsible official office. He stated that He does not maintain the records, that Mr. Cuong Phu performed the inspections, and maintained the records. I reviewed the 2006 and 2007 calendars for both units 1 & 2.
- The Calendar records were up to date. The temperature ranges were between 4 – 6°C for the machines. This is below the 7.5 C. The purchases and hazardous waste invoices were not with the records. Brian was not familiar with were they were kept. I called Mr. Cuong Phu later and requested that he keep the invoices stapled in the calendar, so that for future inspections they could be easily located. The most recent purchases indicated in the calendar was September 6th and 20th for 19.3 gallons for each machine. The consecutive totals for the calendars had been maintained. The highest total was 212 gallons in September 2007. The facility is still classified as a new large.
- The Hazardous waste containers closed and sitting within the secondary containment, beside the machines (See photo)
- I left the annual certification for signature, and requested it be mailed after it was signed by Mr. Cuong.
- I left the Inspection summary, a copy of the rule regarding obtaining a halogen detector by July 27, 2008, water separator proper handling, P2R2 booklet, and info packet for getting 2008 calendar.
- This source appears to be in compliance at this time.
