COMMENTS: On July 30, 2009, Department personnel conducted an unannounced annual air program compliance inspection of Pros 4 Clothes Cleaners located in Okaloosa County. Mr. Augustine Disidoro, plant manager, was available to assist during the inspection.

Mr. Disidoro led a tour of the facility. There are two dry-to-dry machines on site. They were initially purchased from the manufacturer in May 1999 and January 2001 and less than 140 gal/yr of perc is purchased; therefore, it is a new small area source. Perc is ordered two to three times per year and pumped into the machine upon delivery. Receipts for each purchase were available for review. All chemicals kept on site have secondary containment. Emergency contact numbers are kept on the side of the machine for quick reference. Safety Kleen picks up hazardous waste for disposal and receipts were available for review.

Mr. Disidoro produced logs which detailed yearly perc purchased with running annual totals for each month. The logs also included weekly inspections, leak checks, repairs and temperature checks.

The facility appeared to be operating in compliance with permit requirements during the time of the inspection.
