COMMENTS: Facility conducted visible emission test today on the crematory unit. No excess emissions or problems were noted. Facility did not complete a visible emissions test in 2010, although facility was in operation during that time according to the facility's monitoring charts and log records. Facility was requested to forward copies of records (two random temperature charts and records for each month) for the past year to the Department's South District Office in Ft. Myers to verify compliance with the

facility's permit conditions. The crematory operator, Mr. Lewis, stated that the emission unit was last calibrated approximately six months ago.
