

## **HUMAN CREMATORY**

## COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) RE-INSPECTION (FUI)	COMPLAINT/DISCOVE  ARMS COMPLAINT NO	· · · —		
AIRS ID#: 0810193 DATE: <u>9-12-2011</u> ARRIVE: <u>10:30AM</u> DEPART: <u>12:30PM</u>				
FACILITY NAME: BRASOTA SERVICES INC				
FACILITY LOCATION: 1410 COMMERCI	E BLVD UNIT R			
SARASOTA 342	243-5029			
OWNER/AUTHORIZED REPRESENTATIVE: Email: CONTACT NAME: Email: ENTITLEMENT PERIOD: 9/12/2011 / 9/12 (effective date) (end details)	Mobile PHON Mobile 2/2016	E:		
Facility Section  PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box)  ☑ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE				
PART II: ONSITE INTRODUCTORY MEETIN  1. Name(s) of facility representative(s): Mr. Charle  Brief Notes: General Manager		(check ☑ only one box for each question)		
2. Is the Authorized Representative still CHARLES If no, who is?:	HAGUE?			
If different, did the facility provide an administra  3. Is the facility contact still? If no, who is?:				
4. Will facility be conducting VE test(s) during toda If yes, was the compliance authority notified at le				

## $Emissions~Unit~Section \\ {1-HumanCrematory-prim/2ndarychmbr, NG/temp.m\&r/opac.m/100lbs/hr}$

PA	RT I: FILE REVIEW PRIOR TO INSPECTION	(check 🗹 box for each	only one question)
1.	a. Complete AC application or, if no AC permit, initial GP registration received on or after August 30, 1989? b. If yes, were design calculations provided then to confirm a sufficient volume in the	⊠ Yes	□No
3.	secondary chamber combustion zone to provide for at least a 1.0 second gas residence time at 1800 degrees Fahrenheit?	⊠ Yes □ Yes	□No ⊠No
4.	Past Visible Emissions (VE) tests:  a. Was a VE test performed within each of the past 4 calendar years?  b. Has a VE test been performed yet within the current calendar year?  c. If first year of operation, was a VE test performed within 30 days of commencing	∑ Yes □ Yes	□No ⊠No
	operation? N/A  d. Date of last VE test: 12-16-10	Yes	□No
	e. Was the VE test report filed with the compliance authority no later than 45 days after the test? f. Did the facility demonstrate compliance during the last VE test?  If no, what was the problem (if known)?	∑ Yes     ∑ Yes	□No □No
DA	RT II: VISIBLE EMISSIONS TESTING		
FA	RT II: VISIBLE EMISSIONS TESTING	(check <b>✓</b> box for each	only one question)
1.	Was a visible emissions test conducted by the facility for this unit during this site visit?	☐ Yes	⊠No □No □No
	c. The visible emission test resulted in an opacity of % for the highest six minute average. d. Did the visible emission test demonstrate compliance with the limit? (5% opacity, six-minute average, except that visible emissions not exceeding 15% opacity shall be allowed for up to six minutes		□No
2.	Was a visible emissions test conducted by the inspector during this site visit?	Yes Yes	
3.	d. Did the visible emission test demonstrate compliance with the limit?	rds?	□No
	If yes, what reason?	∐ Yes	⊠No
PA	RT III: MONITORING/RECORDKEEPING REQUIREMENTS	(check <b>☑</b> box for each	only one question)
1.	Were there any objectionable odors detected?	Yes	⊠No
	An upwind/downwind survey of the facility was conducted. The observed parameters were:  Downwind odor level detected-  Wind direction - Upwind odor level detected-	(1-10)	
	<b>Continuous Monitoring Systems</b> – Is a continuous temperature monitoring system installed on each unit to record temperatures in the		
b	secondary chamber in accordance with the manufacturer's instructions?	<ul><li>∑ Yes</li><li>∑ Yes</li></ul>	□No
	(Application or initial notification: <sup>1</sup> received on or after 8/30/89; <sup>2</sup> received before 8/30/89)		

PART III: MONITORING/RECORDKEEPING REQUIREMENTS (continued)		
c. Are the following records kept on file, available for inspection, for at least the past two years?		
1) All temperature measurements	Yes	□No
2) all continuous monitoring systems, monitoring devices, and performance testing measurements;		□ N.
monitoring system all continuous performance evaluations	⊠ Yes - ⊠ Yes	∐No □No
4) Adjustments	⊠ Yes	□No
5) Preventive maintenance performed on systems/devices	Yes	No
6) Corrective maintenance performed on systems/devices	Yes	□No
d. Are the temperature charts properly documented with operator name, operator indication of		_
when cremation in the primary chamber was begun, date, time, and temperature markings	Yes Yes	□No
e. Was the crematory unit installed after $2/1/07$ ? If no, skip e.(1) – (3)(1) Is the crematory unit equipped and operated with a pollutant monitoring system to automatical	Yes	⊠No
control combustion based on continuous in-stack opacity measurement?	Yes	□No
(2) Is the system calibrated to restrict combustion in the primary chamber whenever any opacity		
exceeds 15% opacity ?	Yes	□No
(3) Has the opacity measurement system been cleaned and checked for proper operation in accordance with the manufacturer's recommended maintenance schedule?	Yes	□No
accordance with the manufacturer's recommended maintenance schedule:	103	110
	(check 🗹	only one
PART IV: <u>SECONDARY COMBUSTION ZONE TEMPERATURES</u>	box for each	
		4
1. If the application to construct was <b>BEFORE</b> August 30, 1989 is the:		1
a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F		
a. actual operating temperature of the secondary chamber combustion zone no less than <b>1400°F</b> throughout the combustion process in the primary chamber?		No
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li> <li>b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the crematical combustion.</li> </ul>	on	
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li> <li>b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremating process begins in the primary chamber?</li></ul>		□No
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on	□No
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on Yes	□No
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on Yes  Yes  Yes	No No
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on Yes	No No
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on Yes  Yes  Yes	NoNoNo
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li> <li>b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremating process begins in the primary chamber?</li> <li>2. If the application to construct ON or AFTER August 30, 1989 is the: <ul> <li>a. the actual operating temperature of the secondary chamber combustion zone no less than 1600°F throughout the combustion process in the primary chamber?</li> <li>b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremating process begins in the primary chamber?</li> </ul> </li> </ul>	on Yes  ☐ Yes  ☐ Yes  ☐ Yes  On  ☐ Yes	NoNoNoNo
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on Yes  ☐ Yes  ☐ Yes  On ☐ Yes  (check ☑	NoNoNo only one
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li> <li>b. secondary chamber combustion zone temperature equal to or greater than 1400°F before the cremating process begins in the primary chamber?</li> <li>2. If the application to construct ON or AFTER August 30, 1989 is the: <ul> <li>a. the actual operating temperature of the secondary chamber combustion zone no less than 1600°F throughout the combustion process in the primary chamber?</li> <li>b. secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremating process begins in the primary chamber?</li> </ul> </li> </ul>	on Yes  ☐ Yes  ☐ Yes  ☐ Yes  On  ☐ Yes	NoNoNo only one
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber? ————————————————————————————————————</li></ul>	on Yes  ☐ Yes  ☐ Yes  On ☐ Yes  (check ☑	NoNoNo only one question)
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?</li></ul>	on Yes  ☐ Yes  ☐ Yes  On ☐ Yes  (check ☑	NoNoNo only one
a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber?	on Yes	NoNoNo only one question)
<ul> <li>a. actual operating temperature of the secondary chamber combustion zone no less than 1400°F throughout the combustion process in the primary chamber? ————————————————————————————————————</li></ul>	on Yes	NoNoNo only one question)

PART VI: EQUIPMENT MAINTENANCE	(check <b>☑</b> box for each	only one question)	
1. Is the crematory unit maintained in accordance with the manufacturer's specifications?	- X Yes	□No	
2. Is there a written plan onsite which addresses the operating procedures during startup, shutdown and malfunction?	Yes	□No □No □No	
PART VII: EU INSPECTION COMPLIANCE STATUS (check ☑ only one box)			
☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE			

## $Emissions\ Unit\ Section \\ {2-HumanCrematory-prim/2ndarychmbr, NG/temp.} m\&r/opac.m/200lbs/hr$

	Inspector's Name (Please Print)	Date of Inspection	
		9-12-2013	
	Inspector's Signature	Approximate Date of Next Inspection	

**COMMENTS:** Joe Panetta and I (Chris Haines) arrived at the facility at approximately 10:00AM. Upon arrival, we met with Mr. Charles Hague, the general manager of Brasota Services, Inc. I asked to see the temperature records and any other certifying documentation such as maintenance records that the facility kept. The facility had copies of all the required records above, and upon inspection three anomalies were noted: Several cremations of fetal remains were not up to temperature, but this was an issue with the duration of the cremation of remains under 1lb. Opening the door would result in a temperature drop that would not reach the 1600 degrees before the cremation process was finished. Another issue was that during September of 2009, several temperature drops were noted. This was the result of a failing system that was remedied later in October of 2009 when substantial corrective maintenance was performed. The third issue was that on September 25, 2009, the facility had accepted the torso of a cadaver from MedCure, Inc. Mr. Hague provided me with records via fax on 9-12-11 (attached and uploaded) from the Georgia Department of

Human Resources entitled "Permit for the Disposition of Human Remains". I (Chris Haines) spoke with the complaince manager, and they are considered resolved. It was also noted by Mr. Panetta that the facility's copy of their Air Permit included a description of the cremation unit that was permitted to be installed, but had not yet been. (SEE ABOVE, CREMATION UNIT 2 NOT INSPECTED) We informed Mr. Hague that the compliance authority would be notified about this issue and that the permit description should be amended. Mr. Panetta and I concluded our meeting with Mr. Hague at approximately 12:30PM.
