**COMMENTS:** In a compliance inspection on 08/14/2014, AQD staff (E. Malmstrom) observed operations at Marina Bay. Mr. David Hole accompanied staff on the inspection. Houskeeping has improved at this facility. The hazardous materials storage area had containment and labeling on its drums of waste. The facility does bottom painting work on large yachts. They also utilize a boat pull out area where they can pull the vessel on dry dock which better controls paint waste and houskeeping. Mr. Hole submitted VOC records and demonstrated his Surface Water permit and had hazardous materials license displayed.
