Tyes No thout replacement?

**COMMENTS:** In a compliance inspection conducted on 1/26/2011, AQD staff observed operations at Cable Marine East. The facility is a small marina that has one on-water bay, offices, machine shop, paint store, dockage and boat pull out. The hazardous material area housekeeping was improved this year. However, some batteries were observed stored in the open and were moved to the appropriate pallets while the inspector was therre. VOC records will be submitted by the main office.
