**COMMENTS:** This facility makes paving and landscape bricks for Home Depot and Lowes. The dust collectors are located on top of each silo. The material from the silos is mixed with the damp sand and travels into the building via conveyor belts. The relocateable tumbler (#7775595) is still at this location and also had a VE test this day. Silos 5 and 6 have not been active in about 3 years (per Mark Lawrence). There were no violations observed during the inspection.
