Ms. Rene Tharpe Click-On-Clean 4640 Highway 90 East Marianna, Florida 32446

Dear Ms. Tharpe:

On December 1, 2010, a Department representative with the Air Resource Management Program inspected the Click-On-Clean Dry Cleaners ID 0630053. A copy of the inspection report is enclosed. The inspection and a review of Department records indicate the facility was Significant Non-Compliant at the time of the inspection for those items specifically noted in the inspection report. Please notify this office within 15 days of receipt of this letter as to what steps you have taken to correct the deficiencies listed in the report.

This letter applies only to activities covered by the Air Resource Management Program. If you have any questions, please contact C. Mark Sumner at 850/767-0046, or mark.c.sumner@dep.state.fl.us.

Sincerely,

Sally M. Cooey

Panama City Branch Administrator

SMC/ms

Enclosure

| PART VI: <u>LEAK DETECTION AND REPAIRS</u> – Rule 62-213.300 FAC | | | | only one |
|--|--|---------------------------------|---|---|
| 1. | What type of leak detection equipment is used to detect leaks? | be | ox for each | question) |
| | ☐ Halogenated hydrocarbon detector ☐ PCE gas analyzer ☐ None used | | | |
| 2. | Is the halogenated hydrocarbon detector or PCE gas analyzer operated according to | | | |
| | the manufacturer's instructions (manual was available and RO could demonstrate | | | |
| | procedure) ? | Yes | ☐ No | |
| 3. | For major sources is the halogenated hydrocarbon detector or PCE gas analyzer | | | |
| | operated according to EPA Method 21 ? | Yes | ☐ No | N/A |
| 4. | Is the vapor leak inspection conducted by placing the probe inlet at the surface of | | | |
| | each component interface where leakage could occur and moving it slowly along | | | |
| | the interface periphery? $\ \ \ \ \ \ \ \ \ \ \ \ \ $ | Yes | ☐ No | |
| 5. | Is the PCE gas analyzer a flame ionization detector, photo ionization detector, or | | | |
| | infrared analyzer capable of detecting vapor concentrations of PCE of 25 parts per | | | |
| | million by volume (based on documented specifications) ? | Yes | ☐ No | N/A |
| 6. | Is the <u>halogenated hydrocarbon detector</u> capable of detecting vapor concentrations | | | |
| | of PCE of 25 parts per million by volume (based on documented specifications) and | | | |
| | indicating a concentration of 25 parts per million by volume or greater by emitting | | | |
| | an audible or visual signal that varies as the concentration changes? $$ | Yes | ☐ No | N/A |
| 7. | Are the following dry cleaning system components inspected weekly for perceptible leaks (sight, sn | nell or | touch) while | le the |
| | system is in operation (§63.322(k))? | | | |
| | (Inspection with a halogenated hydrocarbon detector or PCE gas analyzer also fulfills the requirement for insp | pection | of perceptib | le leaks) |
| | b) Door gaskets and seating Yes No N/A h) Stills S | | NoNoNoNoNoNoNo | N/AN/AN/AN/AN/AN/A |
| 8. | Are the following dry cleaning system components inspected <u>monthly</u> for <u>vapor leaks</u> using a halog | enated | hydrocarbo | on detector |
| | or PCE gas analyzer while the system is in operation? (Any inspection conducted according to this parag | graph sh | hall satisfy th | ne |
| | requirements to conduct an inspection for perceptible leaks under §63.322(k) or (l)) | | | |

COMMENTS: Ms. Rene Tharpe met me at the facility and provided me with all the requested records. It appears that the facilitity's entitlement to use the perchloroethylene dry cleaners general permit has expired. Please contact the Air General Permit Program or Dickson Dibble at (850) 921-9586 or Marnie Brynes at (850) 921-8978.

The application for renewal is avaliable at http://www.dep.state.fl.us/air/rules/forms/titlevgp/dep62 $_$ 213 $_$ 900(2).pdf , and it must be sent to:

Bureau of Air Monitoring and Mobile Sources, MS 5510

Department of Environmental Protection

2600 Blair Stone Road

Tallahassee, FL 32399-2400

Ms. Tharpe demonstrated the Inficon TCK-Mate halogen leak detector and I reviewed the leak inspection log. The dry cleaning machine was not in operation at the time of this inspection. According to the facility records the facility purchased 138 gallons of Perc. this year. All Containers with perchloroethylene appeared to be maintained tightly sealed.
