COMMENTS: In a compliance inspection conducted on 09/29/2010, AQD staff observed operations at Capital One Dry Cleaner located @ 3177 North State Rd. 7, Margate. FL 33063. The owner was not present during the inspection. The facility has one PERC dry-cleaning machine. The spotting board area did not have any metal plating beneath it and epoxy paint was worn. Behind the PERC dry-cleaning machine an open bucket with possible separator water was observed out of containment and venting to the atmosphere. The Rema vacuum was observed in the boiler room, but had no secondary containment. The drums of hazardous waste were stacked on top of one another and labels were worn. Only one drum of hazardous waste had a locking ring. The attendant at the facility was not aware of where any of the record-keeping was kept. No DEP calendar, PERC receipts, or MSDS sheets or manifests were available for inspection. The facility did not seem to have PERC sniffer to check for leaks. One piece of equipment was attached to a condensate and was venting to the ground. No hazardous material license was observed or posted for inspection.
