COMMENTS: The highest consecutive 12 month total for resin and gel coat usage is 256,125 pounds, or 128.06 tons, from May 2014. No objectionable odors were detected off site. A slight odor was detected on the property. Both Troy and Trisha were present during the inspection. Troy gave the inspector a walk-through of the facility to observe operating conditions. The cast polymer operation was in good condition. The marble-cutting operation was creating particulate matter (PM) to leave the roll-up doors. The inspector advised Troy that the PM is not allowed to leave their site and could potentially lead to an NPDES issue. Troy stated he will buy more wet saws to eliminate the dust issue. No PM was observed leaving the property during the inspection.
