COMMENTS: Ilka Bundy met with Shawn LaFrance, Plant Accountant, and signed in at the main office. The inspector went to the emission unit and met with the consultant, David Jones. This facility is a prestress manufacturing plant. No batching into trucks is done at this site. The plant did not batch during the compliance test due to slow business. The observed opacity was zero percent. The loading rate was 25.5 tons per hour, which is acceptable. This facility has implemented a lot of new safety measures. The entire yard has been paved. Signs have been posted at specific areas describing the activity. There are pedestrian walkways, speed limits posted, and several other safety enhancements. Ilka spoke to "Roc", aka Alvin Waller, Interim Plant Manager. The bags in the baghouse are checked and replaced quarterly, or as needed. The roads are swept as needed. No PM was observed leaving the property. No objectionable odors were detected. The facility appears to be in compliance with their permit conditions at this time.
