COMMENTS: Toured facility with Ken Fickett. They are not currently building any new boats. Their business is very slow and they are only doing repair work on fiberglass boats. A review of their invoices demonstrated that they are using far less than 76,000 pounds of resin and gel-coat per year, less than 2,000 pounds a year. Facility was clean and organized, no open containers or styrene odors were noticed while on site. They did not have 5 years worth of records of resin and gel-coat usage, but general manager Becky Fickett said that they would try to maintain better records. I went over outreach materials that were given to them last year that contained a spreadsheet for maintaining resin and gel-coat usage.
