COMMENTS: I (Chris Haines) arrived at the plant at approximately 12:00PM. When I entered the plant I noticed that a cement truck was being loaded. Although there was not enough time to conduct a VE, I did not note any fugitive dust coming from the truck loading chute. I went into the main office and met with Mr. Lewis Philips, the operations manager that day. I asked if he would show me around the facility so that I can conduct my compliance inspection. Mr. Philips informed me that the plant had been shut down for a long while and that today was a very rare day that they were busy. The block plant was still not in operation. Despite traffic, the plant was very clean, roads were swept and the piles were kept wet by sprinklers. I asked if Mr. Jason Jones was still the person responsible for environmental-related questions and if I could get throughput records from him. (See attached email

for production records.) Mr. Philips said Mr. Jones would have that information. I gave Mr. Philips my card and concluded my meeting with him at approximately 12:30PM. Any unchecked boxes do not apply to this inspection.
