at a rate that is representative of the normal silo loading rate, or at least at the minimum 25 tons per hour rate, unless such rate is unachievable in practice?			
4. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? (If answer to this question is "Yes", then continue on to questions 4.a) and 4.b) below. If answer is "No" then

COMMENTS: 07/31/2008 A site visit was conducted by Compliance Inspector Joe Panetta and Enforcement personnel Linda Novak. An enforcement referrel was generated for this facility (by Joe Panetta) on 03/28/2008 for an expired permit and missing VE's. A new registration form was submitted to Tallahassee 04/07/2008. The reason for the inspection by the enforcement personnel was to answer some questions about previous years activities that may have been in none compliance. Currently the facility has a 270 bbl silo and 700 bbl silo. This information is reflected in the current permit and in ARMS. 5 pictures were taken by Joe Panetta. See attached or navigate to G:\SWD AIR PHOTOS\Joe Panetta Pictures of Compliance Inspections. Boxes not checked in checklist means information does not apply.
