(check ☑ appropriat					
Stack Emissions					
1. Were visible emissions tests conducted during this site visit according to EPA Method 9 (Ref.: Chapter 62-297, F.A.C.)?					
2. Are emissions from silos, weigh hoppers (batchers), and other enclosed storage and conveying equipment controlled to the extent necessary to limit visible emissions to 5 percent opacity?					
3. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo conducted					
at a rate that is representative of the normal silo loading rate, or at least at the minimum 25 tons per hour rate, unless such rate is unachievable in practice?					
		e) operation controlled by the silo do questions 4.a) and 4.b) below. If ans			
skip 4.a) and 4.b)	and continue on to question 5	5.)			
b) During the visi	ible emissions test, was the b	atching rate representative of the ne	ormal batching rate and		
5. If emissions from	the weigh hopper (batcher) of	operation are controlled by a dust co	=		
		ssions tests of the weigh hopper (basentative of the normal batching ra	atcher) dust collector te and duration? Yes No		

PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414, F.A.C. – (continued)					
(check ☑ appropriate box(es)					
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)					
1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the	ne				
annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)	⊠Yes □ No				
N. T. 1911.					
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)					
Did this facility demonstrate: a) initial compliance no later than 30 days after beginning operation?	□Yes □ No				
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form					
submittal date?	□Yes □ No				
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)					
3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to the AGP Notification form submission, and within 60 days prior to each anniversary date?	o ⊠Yes ∏ No				
the AGF Notification form submission, and within 60 days prior to each anniversary date?	M les ∐ No				
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)					
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the					
test was completed?	⊠Yes □ No				
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C.

COMMENTS: The yard and roads are all dirt at this facility. The inspector, Ilka Bundy, requested that the facility water the yard since vehicular movement was causing dust to go up into the air. The plant personnel watered right away using a front-end loader. Water was on the aggregate piles and had wind breaks. The drop point to the trucks had a chute and spray bars to help control dust at the drop point to the batching trucks. The flyash tanker unloaded 24.82 tons in 50 minutes, or 29.78 tph. The cement tanker loaded 26.91 tons in 50 minutes, or 32.29 tph. The observed opacity for all emission units was zero percent. The inspector, Ilka Bundy, did observe one puff from the northmost baghouse ontop of the cement silo. No objectionable odors were detected. Unconfined emissions from vehicular movement was not leaving the property.
