COMMENTS: In a compliance inspection conducted on 05/05/2011, AQD staff observed operations at New England Custom Woodwork. The facility has one spray booth, one contact spraying area, and one dust collector (no pressure treated wood is used). Housekeeping was okay and the facility seemed busier than previous years. Kathy (office manager) submited VOC data to the department at a later date (5/19/2011). On 06/1/11 the facility was emailed a reminder on the need to renew their General Permit for Surface Coating.
