#### COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) COMPLAINT/DISCOVERY (CI) RE-INSPECTION (FUI) ARMS COMPLAINT NO:						
AIRS ID#: 7774813 DATE: 10/25/2011 ARRIVE: 8:02am DEPART: 10:37am						
FACILITY NAME: BEDROCK RESOURCES - MINE CR4 UNIVERSAL						
<b>FACILITY LOCATION:</b> 4289 E CR 470						
SUMTERVILLE 33585						
OWNER/AUTHORIZED REPRESENTATIVE: DARRYL LANKER Email: CONTACT NAME: LEE MADSEN Email:  Mobile: PHONE: (352)3 Mobile:						
ENTITLEMENT PERIOD: 10/13/2008 / 10/13/2013 (effective date) (end date)						
Facility Section  PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box)  ☑ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE						
PART II: ONSITE INTRODUCTORY MEETING						
1. Name(s) of facility representative(s): Mr. Lee Madsen  Brief Notes:	(check ☑ only one box for each question)					
2. Is the Authorized Representative still DARRYL LANKER? If no, who is?:	X YesNo					
If different, did the facility provide an administrative update within 30 days?  3. Is the facility contact still LEE MADSEN?						
4. Will facility be conducting VE test(s) during today's inspection?						

## Emissions Unit Section 1 –Limestone Processing Plant

	ŀ	(check 🗹	•			
<u>Is</u>	box for each question)  s the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processing Plants?  {Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majority is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granite, Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and Gravel;					
	(3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock S (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlo and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.}	ride, Kernite,				
2. 3.	Is the EU located at a fixed or portable nonmetallic mineral processing plant or hot mix asphalt plant that has an aboveground crusher or grinding mill?	⊠ Yes	No No No No			
su If	air carrying particulate matter (PM) emissions from one or more affected EUs.}  If answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to subpart OOO so skip the following questions and go directly to Question 24.  If the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5.					
	Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	☐ Yes	⊠No			
	capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	☐ Yes	⊠No			
	capacity less than or equal to 136 megagrams/hour (150 tons/hour)?	Yes	⊠No			
	equal to 9 megagrams/hour (10 tons/hour)?	Yes	⊠No			

#### 1 -Limestone Processing Plant

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or		
	belt conveyor in a production line that processes saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	⊠No
	{Note: "wet screening operation" means a screening operation which removes unwanted material or		
	which separates marketable fines from the product by a washing process which is designed and operat	ed	
	at all times such that the product is saturated with water. "Saturated material" means mineral materia	d	
	with sufficient surface moisture such that particulate matter emissions are not generated from processi	ng	
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wet		
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line		
	downstream of wet mining operation that process saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	⊠No
	[Note: Wet mining operation means a mining or dredging operation designed and operated to extract		
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic		
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface		
	moisture such that particulate matter emissions are not generated from processing of the material		
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by		
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
<b>I</b> f	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to		
	bpart OOO so skip the following questions and go directly to Question 24.		
	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.		
11	. When was the EU last constructed, modified, or reconstructed? various		
	with the Be last constructed, mounted, of reconstructed. Allous		
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?	Yes Yes	⊠No
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20		
13	Does the EU have a particulate matter capture system (equipment including enclosures,		
	Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes Yes	□No
If	answer to Question 13 is "No" skip the following questions and go directly to Question 19		
11	.Initial Tests:		
17	a. Was an initial PM stack test performed on the control device within 180 days of		
	initial startup of the EU? N/A	☐ Yes	□ No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	Yes	□No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Yes	□No
	d. If yes, was the opacity less than or equal to 7% opacity?	Yes	□No
	d. If yes, was the opticity less than of equal to 770 opticity.	105	
15	If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
	individually in compliance with emissions limits:		
	a. Was an initial PM stack test performed on each vent control device within 180 days of		□ N.
	initial startup of the EU? N/A	Yes	∐ No
	{A "vent" is any opening through which there is mechanically induced air flow for the		
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
	one or more affected EUs.)  b. If was was the EU found to be in compliance with the PM limit of 0.022 g/dcam (0.014 gr/dcaf)?	□ Vac	□ No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	∐ Yes	∐No
	c. Was an initial VE test performed on fugitive emissions from non-vent building openings?		∐No □ No
	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	Yes	∐No

#### 1 -Limestone Processing Plant

16. Is a baghouse used to control emissions from the EU?	☐ Ye	es 🔲No
If yes, the owner operator:  conducts quarterly 30-minute VE tests using Method 22;  uses a bag leak detection system specified in 40 CFR 60.674(d);  follows the requirements of 40 CFR 63AAAAA Lime Manufacturin as specified in 40 CFR 60.674(e); or  none of the above (i.e., out of compliance)	ng	
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity?   N/A	☐ Ye	es 🗌 No
<b>18.Is a wet scrubber used to control emissions from the EU?</b> If yes, does the owner/operator maintain and operate:	☐ Ye	esNo
a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	☐ Ye	esNo
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.}		es 🗀No
19. Is wet suppression used to control emissions from the EU?	☐ Ye	esNo
<ul> <li>If yes:</li> <li>a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles?</li> <li>b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly?</li> <li>c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?</li></ul>	☐ Ye	es 🗀No
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following questions and go directly to Question 24.		
<b>20. Does the EU have a particulate matter</b> <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	☐ Ye	es 🗵No
21. Initial Tests:  a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?	☐ Ye ☐ Ye ☐ Ye ☐ Ye	es 🔲No es 🔲No

Wendy D. Akins  Inspector's Name (Please Print)	10/25/2011  Date of Inspection 10/01/2013	
Inspector's Signature	Approximate Date of Next Inspection	

**COMMENTS:** This unit has not operated since the June 2010 Visible Emissions Testing and the facility does not plan to use this equipment ever again. According to Mr. Madsen, this unit has several screening and return belt options which are not needed for the current market. Mr. Madsen escorted me to the facility "boneyard" where this unit has been placed for storage. Mr. Madsen stated that the unit takes a lot of horse power to operate. It burns a lot of fuel and is much to costly to use. Photos taken of the crusher, screener, and scalper are attached to this inspection report.
