COMMENTS: In a compliance inspection conducted on 3/16/2012, AQD staff (E.Susky) observed operations at New River Marina. The facility is a boat yard that conducts maintenance and bottom paint work on boats. The facility is semi paved and places tarps around and underneath boats that are being worked on. Mr. John Connor (yard manager) accompanied staff on the inspection. He will be submitting VOC records to the department. The housekeeping was much better than previous years and the facility had put in a new recyclable system for their boat wash out.
