PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414, F.A.C. – (continued) (check ☑ appropriate box(es)	
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.) 1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)	
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 2. Did this facility demonstrate: a) initial compliance no later than 30 days after beginning operation? b) annual compliance within 60 days prior to each anniversary of the air general permit notification form submittal date?	☐Yes ☐ No
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to the AGP Notification form submission, and within 60 days prior to each anniversary date?	
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.) 4. Was the required test report filed with the department as soon as practical, but no later than 45 days after test was completed?	
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check ☑ appropriate box(es))	
	e 🗌
 (check appropriate box(es)) Is this facility: 1) a stationary ; 2) a relocatable ; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check only one box.</i>) If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d),) below.)	ing
 (check ☑ appropriate box(es)) Is this facility: 1) a stationary ☒; 2) a relocatable ☐; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check ☑ only one box.</i>) If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d), below.)————————————————————————————————————	ing ☐Yes ⊠ No ☐Yes ☐ No

PART III: <u>OPERATING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414(2)(a) and (b), F.A.C. (continued)					
(check ☑ appropriate box(es))					
Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.) 1. Does the owner /operator of the concrete batching plant take recemissions by: a) management of roads, parking areas, stock piles, and yards 1) paving and maintenance of roads, parking areas, stock piles, and yards 2) application of water or environmentally safe dust-suppremissions?	which shall include one or more of the follow piles, and yards?	Yes No Yes No Yes No Yes No			
b) use of spray bar, chute, or partial enclosure to mitigate emi	ssions at the drop point to the truck?	Yes No			
DA DE MA CIDECIA A CONDUENONO AND DIOCEDANDES D. I.	(2.210.200/A)/D4 E A C				
PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule A. <u>New or Modified Process Equipment</u>	62-210.300(4)(d)4., F.A.C.				
1. Since the last inspection has there been	_	_			
a) installation of any new process equipment?		Yes ⊠ No Yes ⊠ No			
b) alterations to existing process equipment without replacement?					
c) replacement of existing equipment substantially different than that noted on the most recent notification form?					
recent notification form? \square Yes \boxtimes Notice that the content of the above, did the owner submit a new and complete					
notification form and appropriate fee (Rule 62-4.050, FAC) to the appropriate DEP or local program office?		Yes 🗌 No

Inspector's Name (Please Print)	Date of Inspection				
	8/4/2010				
Inspector's Signature	Approximate Date of Next Inspection				

COMMENTS: OCEPD personnel performed a visual emission test (VE) at this facility on 8/4/2009. Mr. Mitch Barina, Plant Manager, was also present. Sara Greivell, representing Grove Scientific & Engineering, the consultant, arrived at approximately 8:30 AM. OCEPD, and the consultant, were informed that the truck would be approximately 30-minutes late. The truck arrived at approximately 8:45 AM loaded with cement (26.69 tons). The truck started pumping at approximately 8:52 AM (8-10 psi), and finished at approximately 9:50 AM (58 minutes). The loading rate was calculated at 27.61 TPH, which was acceptable. A 30-minute VE was performed on the baghouse serving both silos and the weigh hopper. The observed opacity was 0%.

The yard was paved and sufficiently wet to prevent dust/PM from leaving the property. According to the Plant Manager, the yard is swept once per week. The sprinklers serving the aggregate piles were in operation.
