O&M Plan

The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to:

- (1) Operating parameters of the pollution control device;
- (2) Time table for the routine maintenance of the pollution control device as specified by the manufacturer;
- (3) Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;
- (4) A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;
- (5) A record log which will indicate, at a minimum:
 - a. When maintenance and observations were performed;
 - b. What maintenance and observations were performed; and
 - c. Who performed said maintenance and observations.
 - d. Acceptable parameter ranges for each operational check.

[Pinellas County Code, Subsection 58-128]

Reviewed records for the months of Jan 2010 – July 2011

Comments:

The O&M logs were complete and up-to-date. There were no instances of non-compliance to report. The grounds were fairly clean; there was a little gravel runoff from the stockpile due to heavy rain yesterday. David stated it would be cleaned up shortly. The grounds are typically swept or watered daily or on an "as needed" basis. The VE test was up-to-date. There were no trucks loading so a VE test could not be performed during the inspection.

Exit Interview: I informed David Oldenburg that the facility appears to be in compliance at this time. I also informed him that the permit expires in January of 2012.
