

$\frac{\textbf{NON-METALLIC MINERAL PROCESSING}}{\underline{\textbf{PLANTS}}}$

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) COMPLAINT/DISCOVERY (CI) RE-INSPECTION (FUI) ARMS COMPLAINT NO:					
AIRS ID#: 7770389 DATE: 11/5/2012 ARRIVE: 9:50 AM DEPA	ART: <u>12:25 PM</u>				
FACILITY NAME: ORLANDO PAVING COMPANY (TAFT)					
FACILITY LOCATION: 8501 Florida Rock Rd					
ORLANDO 32824-7842					
OWNER/AUTHORIZED REPRESENTATIVE: KENNETH HERRON Email: klherron@earthlink.net CONTACT NAME: Email: ENTITLEMENT PERIOD: 2/6/2012 / 2/6/2017 (effective date) (end date) PHONE: (407)69 Mobile: (321)43 PHONE: Mobile: Wobile:					
Facility Section PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box) ☑ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE					
PART II: ONSITE INTRODUCTORY MEETING 1. Name(s) of facility representative(s):	(check ☑ only one box for each question)				
Brief Notes:					
2. Is the Authorized Representative still KENNETH HERRON?	X YesNo				
If different, did the facility provide an administrative update within 30 days? 3. Is the facility contact still? If no, who is?:					
4. Will facility be conducting VE test(s) during today's inspection?					

Emissions Unit Section 1 –NMMP Plant-crusherw/vib.feedr,2xdeckscrn,6conveys,dieselRICe

		(check ☑	only one
	b	ox for each	question)
1.	the Emissions Unit (EU) subject to 40 CFR part 60 subpart OOO – Nonmetallic Mineral Processin {Note: "Nonmetallic mineral" means any of the following minerals or any mixture of which the majority is any of the following minerals: (1) Crushed and Broken Stone, including Limestone, Dolomite, Granith Traprock, Sandstone, Quartz, Quartzite, Marl, Marble, Slate, Shale, Oil Shale, and Shell; (2) Sand and (3) Clay including Kaolin, Fireclay, Bentonite, Fuller's Earth, Ball Clay, and Common Clay; (4) Rock (5) Gypsum (natural or synthetic); (6) Sodium Compounds, including Sodium Carbonate, Sodium Chlor and Sodium Sulfate; (7) Pumice; (8) Gilsonite; (9) Talc and Pyrophyllite; (10) Boron, including Borax, and Colemanite; (11) Barite; (12) Fluorospar; (13) Feldspar; (14) Diatomite; (15)Perlite; (16) Vermice (17) Mica; (18) Kyanite, including Andalusite, Sillimanite, Topaz, and Dumortierite.} Is the EU located at a fixed or portable nonmetallic mineral processing plant or hot mix asphalt plant that has an aboveground crusher or grinding mill?	g Plants? y e, Gravel; Salt; ride, Kernite, ulite; Yes	No
3.	Is the EU located above ground (i.e., not in an underground mine)?	YesYesYesYes	□No □No □No
su If	answer to any of the four Questions 1 -4 above is "No" then the EU is not subject to bpart OOO so skip the following questions and go directly to Question 24. the answer to all of the four Questions 1-4 above is "Yes" then continue to Question 5. Is the EU subject to 40 CFR part 60 subpart F (Portland Cement Plants) or		
6.	subpart I (Hot Mix Asphalt Facilities), or does it follow in the plant process any other EU that is subject to 40 CFR part 60 subpart F or subpart I?	☐ Yes	⊠No ⊠No
	capacity less than or equal to 23 megagrams/hour (25 tons/hour)?	☐ Yes	⊠No
σ.	equal to 9 megagrams/hour (10 tons/hour)?	Yes	⊠No

$\underline{1-NMMP\ Plant-crusherw/vib.feedr,} 2x decks crn, 6 conveys, diesel RICe$

9.	Is the EU a wet screening operation or subsequent screening operation, bucket elevator or		
	belt conveyor in a production line that processes saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	⊠No
	{Note: "wet screening operation" means a screening operation which removes unwanted material or		
	which separates marketable fines from the product by a washing process which is designed and operat	ed	
	at all times such that the product is saturated with water. "Saturated material" means mineral materia	l	
	with sufficient surface moisture such that particulate matter emissions are not generated from processi	ng	
	of the material through screening operations, bucket elevators and belt conveyors. Material that is wet		
	solely by wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
10	Is the EU a screening operation, bucket elevator or belt conveyor in the production line		
	downstream of wet mining operation that process saturated material up to the first crusher,		
	grinding mill or storage bin in the production line?	☐ Yes	⊠No
	{Note: Wet mining operation means a mining or dredging operation designed and operated to extract		
	any nonmetallic mineral from deposits existing at or below the water table, where the nonmetallic		
	mineral is saturated with water. "Saturated material" means mineral material with sufficient surface		
	moisture such that particulate matter emissions are not generated from processing of the material		
	through screening operations, bucket elevators and belt conveyors. Material that is wetted solely by		
	wet suppression systems is not considered to be "saturated" for purposes of this definition.}		
I f	answer to any of the six Questions 5 -10 above is "Yes" then the EU is not subject to		
su	bpart OOO so skip the following questions and go directly to Question 24.		
I f	the answer to all of the six Questions 5-10 above is "No" then continue to Question 11.		
11	.When was the EU last constructed, modified, or reconstructed? 1/2006		
12	. Was the EU constructed, modified, or reconstructed on or after 4/22/2008?	☐ Yes	⊠No
12	. Was the De constructed, induffice, of reconstructed on of arter 4/22/2000.	1 C3	₩140
If	answer to Question 12 is "No" skip the following questions and go directly to Question 20		
13	.Does the EU have a particulate matter capture system (equipment including enclosures,		
	Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	Yes Yes	□No
If	answer to Question 13 is "No" skip the following questions and go directly to Question 19		
14	.Initial Tests:		
•	a. Was an initial PM stack test performed on the control device within 180 days of		
	initial startup of the EU? N/A	☐ Yes	□ No
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	Yes	□No
	c. Was an initial VE test performed on any fugitive emissions (escaping capture system)?	Yes	□No
	d. If yes, was the opacity less than or equal to 7% opacity?	Yes	□No
	July that is a provided and the state of the		
15	.If the EU is a building enclosing any other regulated EUs and all enclosed EUs are not		
	individually in compliance with emissions limits:		
	a. Was an initial PM stack test performed on each vent control device within 180 days of		
	initial startup of the EU?	Yes Yes	∐ No
	{A "vent" is any opening through which there is mechanically induced air flow for the		
	purpose of exhausting from a building air carrying particulate matter (PM) emissions from		
	one or more affected EUs.}	□ 37	□ x ₁
	b. If yes, was the EU found to be in compliance with the PM limit of 0.032 g/dscm (0.014 gr/dscf)?	∐ Yes	∐No
	c. Was an initial VE test performed on fugitive emissions from non-vent building openings?	Yes	∐No
	d. Were initial fugitive emissions from non-vent building openings less than or equal to 7% opacity?	☐ Yes	∐No

$\underline{1-NMMP\ Plant-crusherw/vib.feedr, 2xdeckscrn, 6conveys, diesel RICe}$

16. Is a baghouse used to control emissions from the EU?	Yes	□No
If yes, the owner operator: conducts quarterly 30-minute VE tests using Method 22; uses a bag leak detection system specified in 40 CFR 60.674(d); follows the requirements of 40 CFR 63AAAAA Lime Manufacturing as specified in 40 CFR 60.674(e); or none of the above (i.e., out of compliance)	ng	
17. If the EU is an individual, enclosed storage bin controlled by a baghouse, were initial fugitive emissions less than or equal to 7% opacity? N/A	Yes	☐ No
18.Is a wet scrubber used to control emissions from the EU? If yes, does the owner/operator maintain and operate:	Yes	□No
a. a device for the continuous measurement of the pressure loss of the gas stream through the scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions?	Yes	□No
b. a device for the continuous measurement of the scrubbing liquid flow rate to the wet scrubber and the device has been calibrated on an annual basis in accordance with manufacturer's instructions? {Note: The monitoring device must be certified by the manufacturer to be accurate within +5% of design scrubbing liquid flow rate.}	Yes	□No
19. Is wet suppression used to control emissions from the EU?	Yes	□No
 If yes: a. Does the owner/operator perform monthly inspections to check that water is flowing to the discharge spray nozzles? b. Does the owner/operator initiate corrective action within 24 hours and complete corrective action as expediently as practical is water is not flowing properly? c. Is each inspection of the spray nozzles, including the date and any corrective action taken, recorded in the written or electronic logbook as required by 40 CFR 60.676(b)?	☐ Yes	□No
If the EU was constructed, modified, or reconstructed on or after 4/22/2008 skip the following questions and go directly to Question 24.		
20. Does the EU have a particulate matter <i>capture system</i> (equipment including enclosures, Hoods, fans, dampers, etc.) to capture and transport particulate matter to a control device?	☐ Yes	⊠No
21. Initial Tests: a. Was an initial PM stack test performed on the control device within 180 days of initial startup of the EU?	☐ Yes ☐ Yes ☐ Yes ☐ Yes	☐ No ☐No ☐No ☐No

$\underline{1-NMMP\ Plant-crusherw/vib.feedr,} 2x decks crn, 6 conveys, diesel RICe$

22. If the EU is a building enclosing any	other regulated EUs	and all enclosed EUs are not			
individually in compliance with emi					
a. Was an initial PM stack test perfor	med on each vent contr	ol device within 180 days of		_	
initial startup of the EU?			/A	☐ Yes	∐ No
{A "vent" is any opening through whi					
purpose of exhausting from a building	air carrying particular	te matter (PM) emissions from			
one or more affected EUs.}				_ ,,	
b. Was the EU found to be in complia				∐ Yes	∐No
c. Were initial fugitive emissions from	n non-vent building ope	enings less than or equal to 7%	opacity?	∐ Yes	□No
22 Is a west sample an used to control on	siggiang fuam the EU9			□ Vas	⊠ No
23.Is a wet scrubber used to control en If yes, does the owner/operator mainta				∐ Yes	⊠No
a. a device for the continuous measur	•	oss of the gas stream through the			
scrubber and the device has been					
instructions?				☐ Yes	□No
{Note: The monitoring device m				1 Cs	
pascals +1 inch water gauge pres	•	nanuracturer to be accurate with	IIII 1230

Facility Section (continued)

REASONABLE PRECAUTIONS FOR UNCONFINED EMISSIONS	(check 🗹 box for each	•
1. Does the owner/operator of the NMMP Plant take reasonable precautions to control unconfined		-
emissions by: a) Use of water suppression system(s) with spray bars located wherever unconfined emissions occur (at the feeder(s), the entrance and exit of the crusher(s), the classifier screens, and the conveyor drop points)?	⊠ Yes	☐ No
b) Use of water trucks equipped with spray bars to apply water or effective dust suppressant(s) on a regular basis (to all stockpiles, roadways and work yards)? N/A c) Paving and maintaining roads and parking areas? N/A d) Removal of particulate matter from roads and other paved areas under control	⊠ Yes ⊠ Yes	☐ No ☐ No
of the owner/operator to prevent re-entrainment, and from building or work areas to reduce airborne particulate matter? N/A e) Reduction of stock pile height, or installation of wind breaks to mitigate wind entrainment of	☐ Yes	☐ No
particulate matter from stock piles? 🖂 N/A	Yes	☐ No
2. If reasonable precautions <u>not</u> being taken: a) Did the inspector perform a general VE test (20% opacity)? b) If tested: ()% opacity. Were the visible emissions < 20% opacity? c) What caused the problem(s) (if known)?	☐ Yes ☐ Yes	□ No □No
CONFIRMATION OF GENERAL PERMIT ELIGIBILITY	(check ☑ box for each o	only one question)
Does this facility keep records to show that it does not have the potential to emit: a) 10 tons per year or more of any hazardous air pollutant? b) 25 tons per year or more of any combination of hazardous air pollutants? c) 100 tons per year or more of any other regulated air pollutant?	- X Yes	□No □No □No
2. Does this facility include: a) any emission units or activities not covered by the applicable air general permit (with the exception units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? If YES, what non-exempt units or activities?	or	⊠No
b) any emissions units or activities authorized by another air general permit where such other air gene permit and this general permit specifically allow the use of one another at the same facility? If YES, what other general permit units or activities?		⊠No

3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a) 275,000 gallons of diesel fuel?	-	No No No No No
GENERAL CONDITIONS	(11 [7]	1
1. Has the owner or operator allowed the circumvention of any air pollution control device, or	(check 🗹 box for each o	only one question)
Allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices?	☐ Yes	⊠No
2. Does the owner or operator:a) maintain the authorized facility in good condition?b) ensure that the facility maintains its eligibility to use the air general permit and complies with all	⊠ Yes	□No
terms and conditions of the air general permit?	⊠ Yes	□No
to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules?	⊠ Yes	□No
DELOCATADI E DI ANT		
 RELOCATABLE PLANT 1. The facility: ☐ is stationary; ☐ is relocatable; or ☐ consists of both stationary and relocatable NMMP and/or concrete batching plants. (If only stationary, skip the following questions 2 and 3.) 	(check ☑ box for each o	only one question)
 2. For a relocated NMMP plant: a) did the owner or operator notify the appropriate Department or Local Air Program by telephone, e-mail, fax, or written communication at least one business day prior to changing location? b) did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-210.900(6 to the Department or Local Air Program no later than five business days following relocation? 	5)]	□No
3. If the relocatable NMMP plant was co-located at a facility with a separate air construction or air operat permit, and the relocatable NMMP plant is <u>not</u> included as an emissions unit in that separate permit: a) was the relocatable NMMP plant being used for a non-routine purpose?		□No
If YES, were any periods more than 6 months in any consecutive 12-month period?	Yes	□No

CHANGES Administrative Changes:	(check 🗹 box for eac	•	
 Were there any changes in the name, address, or phone associated with a change in ownership or with a physic operations comprising the facility; or any other similar 	cal relocation of the facility or any emissions units or minor administrative change at the facility? Yes	<u>⊠</u> No	
2. If YES, did the facility provide written notification wit	thin 30 days of the change? Yes	□No	
New or Modified Process Equipment or Change in Ownership: 3. Since the last registration form submittal has there been a) Installation of any new process equipment?			
Ilka Bundy	11/5/2012		
Inspector's Name (Please Print)	Date of Inspection		
	12/31/2013		
Inspector's Signature	Approximate Date of Next Inspection		

COMMENTS: Inspector Ilka Bundy met with Kent Bottorf, consultant, and Ken Herron, crusher owner, on November 5, 2012, to audit the visible emissions compliance test on the RAP Crusher, S/N 30507. The crusher was located on Orlando Paving Corporation's property in Taft (AIRS ID# 0950031). It should be noted that the 15-day notice was waived by Ilka Bundy in order for this facility to conduct its compliance testing while it is in Orange County. The inspector audited 7 of 9 points on the crusher. Two of the points are not subject to Subpart OOO, but are required to be done for other counties due to their ordinance. All points on the crusher had an observed opacity of zero percent. The crusher operated at 150 TPH. One brown water hose was used to supply water to the spraybars inside the crusher. Crushing Inc. appears to be in compliance with their air general permit at this time.
