COMMENTS: The compliance status was based on a records review only. I did not see this crusher operate during this inspection because it was being moved to Panama City. The proper notification of the relocation was made. Testing was done in 2003 and was compliant with the visible emissions limits. Also it was observed operating during the 2005 inspection of Plant #3, ID 7775118, and was found to be in compliance at that time.
