COMMENTS: The facility was found to be in compliance with their air permit for the inspection that was conducted on this date. The dry cleaning machine was not operating at the time of the inspection. A halogen leak detector is being used by the facility to comply with the EPA requirement. The perchloroethylene hazardous waste container was labeled and date was documented on the label. All waste containers they have a lid. During the inspection dry cleaning machine was not operating. The perc separator water accumulates in a closed 5 gallon plastic bucket the transferred to a misting unit and vented to the outside ambient air. The inspector checked the machine for leaks using EPD's halogen leak detector. No perchloroethylene vapors were found.
