**COMMENTS:** Pre-inspection Review: On January 25, 2012, Mr. Bill Pagano of Prestige sent a General Permit Entitlement surrender letter for this facility. According to inspection records, this facility was operating only intermittently in October 2008. The 2009 Visible Emissions Testing was submitted to and processed by the Central District. Inspection Findings: Upon my arrival at the facility, it was clear this location has been shut down for quite some time. The gates were both closed and chained. The aggregate piles were overgrown and grass is growing up in the driveways. Do Not Enter signs were posted at 30 ft intervals along the front fence line and there were not even any signs indicating a company name. Photos were taken during this site visit and are attached to this report.
