Mr. Wayne Walden Operations Manager Griffin Sand and Concrete Co., Inc. 20301 Evans Avenue Blountstown, Florida 32424

Dear Mr. Walden:

On July 14, 2011, a Department representative with the Air Resource Management Program inspected the Griffin Sand and Concrete Co., Inc., Blountstown Concrete Batch Plant ID 0130009. A copy of the inspection report is enclosed. The inspection and a review of Department records indicate the facility was in compliance at the time of the inspection for those items specifically noted in the inspection report.

This letter applies only to activities covered by the Air Resource Management Program. If you have any questions, please contact C. Mark Sumner at 850/767-0046, or *mark.c.sumner@dep.state.fl.us*.

Sincerely,

Sally M. Cooey Panama City Branch Administrator

COMMENTS: The annual EPA Method 9 visual Emission test for this facility was performed by Barbra Sviglin on June 3, 2011, and it was reviewed by the department on June 23, 2011. This facility has one cement silo and one flyash silo, and the silos were loaded during the VE test at 26 tons per hour. The emissions for the weigh hopper/batcher is not controlled by the silo dust collector. The weigh hopper/batcher emissions are controlled by a spray bar and a partial enclosure at this facility. The operation of the spray

bar was observed, and it appeared to operate as designed. One truck was loaded during this inspection and it appeared that the spray bar and enclosure adequately controls dust emissions at this time. Prior to the most recent VE test the previous visual emission test was performed at this facility on July 7, 2010, and it was reviewed by the Department on July 14, 2010. The facility maintains records for the amount of concrete batched from this facility. The plant itself is powered by the electrical grid. The roads and parking areas are maintained to prevent unconfined emissions by application of water, removal of material, and limited paving. The stock piles are wetted and maintained below the height of the binblocks to mitigate wind entrainment of particulate matter. Please continue with maintenance and housekeeping to ensure all particulate matter is confined to the property boundary.
