COMMENTS: Met with Gwen Dixon. Ms. Dixon indicated she was the new manager at the site and had started managing the facility approximately 2 weeks ago. Ms. Dixon indicated that she had completed training on drycleaners, and was scheduled to receive training on the drycleaning machines at the facility next week. The man that operates the machines at the site was not present during the inspection. I informed Ms. Dixon that the entitlement for the site had expired and a new notification form should be submitted as soon as possible. Since she has internet access, I showed her our webpage and we downloaded a notification form with instructions. Ms. Dixon explained that she had audited their perc purchase records and showed me their perc receipts. Ms. Dixon showed me a second drycleaner machine at the site and indicated that it had been purchased last year but has not operated and is broken. Our inspection conducted last August 2006 noted that a new pre-owned dry to dry machine was installed in February 2006.

Ms. Dixon indicated that she has ordered new temperature gauges for the existing machine, because they are "sticking" and you have to tap them to get an accuarte reading.

Before leaving we discussed the following:

- 1) A new notification form noting 2 perc machines at the site needs to be submitted to Tallahassee as soon as possible;
- 2) The owner needs to complete, sign, and submit the original "Annual Compliance Certification Form" to the Pensacola office by September 15; and
- 3) Submittal of a copy of their startup, shutdown, and malfunction plan would help show they want to get back into compliance.
