**COMMENTS:** Owner was not present during the inspection and had not filled out the Statement of Compliance Form. I spoke to Terry Longtine, employee of X Clean Cleaners. Mr. Longtine indicated that the Owner's wife had just brought the dry cleaner calendar record to the site. I asked Mr. Longtine to tell the owner that the general permit for the site expires September 20, 2007, and a new notification form needs to be submitted. I left a 19-page copy of a notification form, instructions, and general permit conditions with Mr. Longtine. In the package of information that I left, I used a red pen to mark information concerning:

- 1) The requirement to notify us of any change in status of the facility;
- 2) Requirements for new large area sources;
- 3) The requirement to maintain/keep records on the site; and
- 4) Instructions for mailing the completed form.

I discussed each of these items with Mr. Longtine. I showed Mr. Longtine a copy of last year's inspection checklist for the site and read our comments concerning that inspection to him. Our comments included that a note for the responsible official was left informing the owner of the requirement to notify us of the change in the facility size. I could not find where we were notified. Previous to 2006, records on file indicate that the facility did not use more than 140 gallons of perc. The 2006 and 2007 calendars indicate the facility uses more than 140 gallons of perc and is now classified as a new large area source.

Mr. Longtine could not find perc purchase receipts for purchases made in 2006 and 2007. Mr. Longtine indicated they did not have a Startup, Shutdown, Malfunction plan.
