COMMENTS: This inspection is a crematory initiative inspection and measurements were taken of the crematory unit to determine the location of the thermocouple. I am required to input a status (MNC or In Compliance). I have put this facility in compliance until the calculations prove or disprove that the thermocouple(s) are properly placed. The location of the thermocouples will be addressed after the measurements are reviewed by Department Staff. At that time it will be determined if the status should be changed to MNC.
