**COMMENTS:** A joint inspection was conducted with a member of the SED hazardous waste section. The owner was not present, so the staff did not have records for the perc purchased, nor the leak detection logs.

SED waste staff followed up with the manager present and was able to get several issues resolved, including getting the floor resealed with epoxy and getting the water tested. The Air inspector made several attempts to contact the owner, and was successful on April 2 to complete the checklist.

The owner said that he uses the TIF5505 Halogenated Hydrocarbon detector weekly. He did not record this in the past, but will now that he has the DEP dry cleaner calendar. Additionally, he keeps receipts for the perc, but did not keep a rolling 12 month average. The managing staff member agreed to keep better records.
