**COMMENTS:** The purpose of the visit was an annual inspection. We found the following:

1. The record keeping of the Perc purchase was very good and organized.
2. The gauge temperature reading was recorded weekly with an average of 45° F with none of the reading were above 45° F even though this facility is exempt from recording the temperature.
3. The vicinity around the dry cleaning machine was very clean and well maintained.
4. The Perc was loaded directly with a hookup connection. No container of perc was at the site.
5. The monthly perc consumption was recorded correctly and the total for past 12 months was 20 gallons and it was verified.
6. The machines were not in operation today. No leaks or odors were noticed.
7. The waste from the dry cleaning machine was properly store in the tight lid containers to be disposed in accordance with regulations.
8. This facility classified as a small area source.
