COMMENTS: On December 2, 2010, a Department representative conducted an unannounced compliance inspection at Gulf Coast Wilbert. I met with Ms. Blenda Colclasure, who is the office manager for the facility. Ms. Colclasure explained to me that the batch plant has been sold and is no longer on site. Mr. Chapman plans to purchase a smaller batch plant in the future.

Because the concrete batch plant is no longer on site, the inspection checklist questions that are unanswered are not applicable.

As a reminder, prior to constructing and operating the new concrete batch plant a concrete batching plant air general permit registration form must be submitted to the Department.

Registration of a facility that is currently authorized to operate under the terms and conditions of an air general permit is classified as a re-registration. An owner or operator shall re-register the facility in the following cases:

- a. Impending expiration of the term for air general permit use;
- b. Change of ownership of all or part of the facility;
- c. Proposed new construction, modification, or other equipment change that requires registration pursuant to paragraph 62-210.310(2)(e), F.A.C.; and
- d. Any other change not considered an administrative correction under paragraph 62-210.310(2)(d), F.A.C.
