COMMENTS: The facility does routine baghouse maintenance bi-monthly. The facility uses about 500 gallons of diesel fuel per week. The fuel is provided by Bradenton Fuel Oil. When weather is clear and dry, the facility constantly waters aggregate piles. The facility has not added any new equipment since the last inspection in 2006. The facility contact did say when business picks-up, they may consider adding new equipment. The facility has conducted all necessary VE testing. Next VE tests should be conducted before 06/11/2009. Facility provided records upon request. This facility was adequately wet and was also clean.
