Emissions Unit Section

| 1 – Concrete batch plant | northern silo 1 | (Flyash) subject | to 5% Opacity Limit |
|--------------------------|-------------------------------------|------------------|---------------------|

| PART I: <u>FILE REVIEW PRIOR TO INSPECTION</u> | (check ☑ box for each | only one question) |
|--|--------------------------|-----------------------|
| 1. Date of last inspection: <u>01May2013</u> | | - - |
| 2. Past Visible Emissions (VE) tests: | N | |
| a. Was a VE test performed within each of the past 4 calendar years? | | |
| b. Has a VE test been performed yet within the current calendar year? | - 🗌 Yes | 🛛 No |
| c. If first year of operation, was a VE test performed within 30 days of commencing operation? X N/A | Yes | 🗌 No |
| d. Date of last VE test: <u>01May2013</u> e. Was the VE test report filed with the compliance authority no later than 45 days after the test? f. Did the report state the actual silo loading rate during emissions testing? g. What was the actual silo loading rate? <u>25.49</u> tons/hour | | □ No □ No |
| b. If weigh hopper(batcher) emissions controlled by the silo dust collector, did the report state whether or not batching occurred during emissions testing? X N/A i. Did the test report state the actual batching rate during emissions testing? | - Yes | □ No ⊠ No |
| k. Did the emissions unit demonstrate compliance with the 5% opacity limit during the last VE test? If not, what was the problem (if known)? | Yes | 🗌 No |
| | | |
| PART II: <u>STACK EMISSIONS</u> from a silo, weigh hopper(batcher) or other enclosed storage and conveying equipment | (check 🗹 box for each | only one question) |
| 1. Was a visible emissions test conducted by the facility for this unit during this site visit? | - 🛛 Yes | 🗌 No |
| a. Was the visible emissions test conducted according to EPA Method 9? | - 🛛 Yes | No No |
| b. The visible emission test resulted in an opacity of 0 % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit? | | D No |
| d. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo c | onducted at a r | ate |
| that is representative of the normal silo loading rate? \bigotimes Yes \square No \square N/A – silo not loading rate? | | |
| e. If silo loaded, was the minimum loading rate of 25 tons/hour achievable in practice? f. What was the silo loading rate? <u>31.12</u> tons/hour | | 🗌 No |
| g. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? If YES, then continue on to questions $g(1) - g(3)$ below. If answer NO, then skip $g(1) - g(3)$ and go to | | No No |
| Was the weigh hopper (batcher) in operation during the visible emissions test? During the visible emissions test, was the batching rate representative of the normal batching r | ate and | □ No |
| duration? | 🗌 Yes lutes | 🗌 No |
| h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which from the sile dust collector which from the sile dust collector which hopper (batcher) dust as | | |
| from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust co conducted while batching at a rate that is representative of the normal batching rate and duration 2) What was the batching rate? tons/hour. What was the batching duration? minu | n? 🗌 Yes | 🛛 No |
| What was the backing face: tons/nour. what was the backing duration? minut Was a visible emissions test conducted by the inspector for this unit during this site visit? | | 🗌 No |
| a. Was the visible emissions test conducted by the inspector for this time during this site visit. | | |
| | - 🛛 Yes | |
| b. The visible emission test resulted in an opacity of <u>0</u> % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit? | | □ No |

| 1) Was the weigh hopper (batcher) in operation during the visible emissions test? | Yes | 🗌 No |
| 2) During the visible emissions test, was the batching rate representative of the normal batching rate duration? 2) What would be table to be tables of the normal batching rate representative of the normal batching rate duration? | Yes | 🗌 No |
| 3) What was the batching rate? tons/hour . What was the batching duration? minu h. 1) If emissions from the weigh hopper (batcher) operation are controlled by a dust collector which | | |
| from the silo dust collector, was the visible emissions test of the weigh hopper (batcher) dust colle | - | |
| conducted while batching at a rate that is representative of the normal batching rate and duration?2) What was the batching rate? tons/hour. What was the batching duration? minute | | 🛛 No |
| Was a visible emissions test conducted by the inspector for this unit during this site visit? Was the visible emissions test conducted according to EPA Method 9? | Yes Yes | □ No □ No |
| b. The visible emission test resulted in an opacity of <u>0</u> % for the highest six-minute average. c. Did the visible emissions test demonstrate compliance with the 5% opacity limit? | | □ No |

Facility Section (continued)

| CONFIRMATION OF GENERAL PERMIT ELIGIBILITY | |
|---|---|
| | (check \mathbf{v} only one box for each question) |
| | box for each question) |
| Does this facility keep records to show that it does not have the potential to emit: a. 10 tons per year or more of any hazardous air pollutant? b. 25 tons per year or more of any combination of hazardous air pollutants? c. 100 tons per year or more of any other regulated air pollutant? | 🛛 Yes 🗍 No |
| 2. Does this facility include: | |
| a. Any emission units or activities not covered by the applicable air general permit (with the excepti units and activities that are exempt from permitting pursuant to subsection Rule 62-210.300(3) or Rule 62-4.040, F.A.C.)? | |
| b. Any emissions units or activities authorized by another air general permit where such other air ge permit and this general permit specifically allow the use of one another at the same facility? If YES, what other general permit units or activities? | |
| 3. Is the total combined annual facility-wide fuel usage of all plants less than or equal to: a. 275,000 gallons of diesel fuel? b. 23,000 gallons of gasoline? c. 44 million standard cubic feet on natural gas? d. 1.3 million gallons of propane? e. Or an equivalent prorated amount if multiple fuels are used onsite (use equation below)? | ⊠ Yes □ No ⊠ Yes □ No ⊠ Yes □ No |
| gal diesel/yrgal gasoline/yrMM SCF nat. gas/yr+MM gal proposition275,000 gal diesel/yr23,000 gal gasoline/yr44 MM SCF nat. gas/yr1.3 MM gal proposition | |
| 4. Has the owner/operator maintained, available for inspection, site-wide records of monthly fuel cons for each consecutive 12-period for the past 5 years? | |

| GENERAL CONDITIONS | (check 🗹 box for each | • |
|--|--------------------------|------|
| 1. Has the owner or operator allowed the circumvention of any air pollution control device, or allowed the emission of air pollutants without the proper operation of all applicable air pollution control devices? | 🗌 Yes | 🖂 No |
| Does the owner or operator: a. Maintain the authorized facility in good condition? | | |
| b. Ensure that the facility maintains its eligibility to use the air general permit and complies with all terms and conditions of the air general permit? 3. Has the owner or operator allowed you, as the duly authorized representative of the Department, access | | 🗌 No |
| to the facility at reasonable times to inspect and test and to determine compliance with the air general permit and Department rules? | _ | 🗌 No |

| RELOCATABLE PLANT: | (check ☑ only one box for each question) | |
|--|---|---|
| 1. Is the facility: stationary ⊠; relocatable □; or consisting of both stationary and relocatable [concrete batching and/or nonmetallic mineral processing plants? (<i>If only stationary, skip the</i> | | |
| 2. Is the relocatable concrete batching plant used to mix cement and soil for onsite soil augmentation or stabilization? | Yes No | |
| a. Did the owner or operator notify the appropriate Department or Local Air Program by telep e-mail, fax, or written communication at least one business day prior to changing location b. Did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-2 | ? Yes No | |
| to the Department or Local Air Program no later than five business days following a reloca c. Did the owner or operator transmit a Facility Relocation Notification Form [DEP No. 62-2 to the appropriate Department or Local Air Program at least five business days prior to relo | 10.900(6)] | |
| If the relocatable plant was co-located at a facility with a separate air construction or air operand the relocatable batch plant is not included as an emissions unit in that separate permit: | | |
| a. Was the relocatable batch plant being used for a non-routine purpose (i.e, there is no repeat If YES, what was the purpose? | ted usage)? 🗌 Yes 🗌 No | |
| b. Were records kept by the owner/operator to indicate how long it was co-located at the permitted facility? If YES, were any periods more than 6 months in duration? | Yes No | |
| | | |

Inspector's Signature

COMMENTS: Inspector Omar Horta met with Ralph Watty, Plant Supervisor, and Bruno Ferraro, consultant for Grove Scientific & Engineering on 3 April 2014 to audit the visible emision test on EU/Silos 1, 2 and 3 baghouses. One tanker of flyash was split between Silo 1 and 2. Loading rate on Silos 1 and 2 was 31.12 tons per hour. Type III cement was used on Silo 3 with a loading rate of 27.62 tons per hour. The observed opacity on all baghouses was zero percent.

Approximate Date of Next Inspection
