

Florida Department of Environmental Protection
ARM Inspection Report

ARMS ID No. 850138	Owner/Company Name: US PAVERSCAPE, LLC	Inspection Date: 6/24/07
------------------------------	--	------------------------------------

Site Name: US PAVERSCAPE	County: MARTIN
------------------------------------	--------------------------

Permit No(s). 0850138002AG	Expiration Date: September 12, 2008	Type: AG
--------------------------------------	---	--------------------

Facility Contact Name: Ray Paulding	Title: President	Phone: 904-886-7796
---	----------------------------	-------------------------------

Emissions Unit(s):	Compliance Status:
Fac Wide	IN

Field Observations:

I was on site at 8:00 AM to witness visible emissions testing. I observed no opacity readings above "0."

I witnessed no fugitive dust emissions while at the plant. All areas of the plant were inspected, including the paved area where the finished pavers are stored. The plant was generally free of accumulated particulate matter, except for an area where production of pavers is most active with motorized lift operations at the southern side of the production area.* Mr. Paulding reported that the plant is swept two to three times a week. I advised Mr. Paulding of the need to implement reasonable precautions. Mr. Paulding reported that all aggregate materials will be eventually be covered. Also, more of the plant will be paved. One area on the eastern side of the production area is awaiting city permitting and will be paved with masonry interlocks.

The road shared by US Paverscape and Continental Concrete was wet at the US Paverscape entrance. The rest of the plant was mostly dry.

Mr. Paulding made copies of Cartridge Pulse C-P Series silo dust collector documents for the Department's file upon my request.

No railcar materials were delivered during the inspection.

** the accumulated material was a very fine, brown material.*

Inspector's Name Allen Rainey	Signature: <i>Allen J Rainey</i>	Date: 6/26/07
