**COMMENTS:** On August 29, 2013 I visited this facility to conduct the annual compliance inspection. On site I met Dixon Olan, the manager of the facility. This facility manufactured eight (8) boats in the last calender year. The total amount of styrene containing material used in the last calender year was 6702 pounds. There was no objectionable odor detected inside or outside the facility. I mentioned to Mr. Olan that the entitlement of this facility would expire on September 28, 2013.
