(check ☑ appropriat Stack Emissions 1 Were visible emiss 62-297, F.A.C.)?- 2 Are emissions from controlled to the emissions	e box(es)) sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible	nis site visit according to EPA Metho ers), and other enclosed storage and of e emissions to 5 percent opacity?	d 9 (Ref : Chapter ⊠Yes □ No conveying equipment ⊠Yes □ No	
(check ☑ appropriat Stack Emissions 1 Were visible emiss 62-297, F.A.C.)?- 2 Are emissions from controlled to the e 3 During visible em	e box(es)) sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust co	nis site visit according to EPA Metho ers), and other enclosed storage and of the emissions to 5 percent opacity?	d 9 (Ref : Chapter	
(check ☑ appropriat Stack Emissions 1 Were visible emissions from the emission that a rate that is repunless such rate is	sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust copresentative of the normal silo unachievable in practice?	nis site visit according to EPA Methorers), and other enclosed storage and of emissions to 5 percent opacity?llector exhaust points was the loadin loading rate, or at least at the minimum.	d 9 (Ref : Chapter	
(check ☑ appropriat Stack Emissions 1 Were visible emissions from the controlled to the emissions of the emissions of the emissions of the emissions from the emission that the emission the emission that the emission the emission that the emission that the emission the emission that	sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust copresentative of the normal silo unachievable in practice?	ers), and other enclosed storage and of emissions to 5 percent opacity?	d 9 (Ref : Chapter	
(check ☑ appropriat Stack Emissions 1 Were visible emiss 62-297, F.A.C.)?- 2 Are emissions from controlled to the e 3 During visible emist at a rate that is repunless such rate is 4 Are emissions from to this question is skip 4 a) and 4 b)	m silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust co presentative of the normal silo unachievable in practice?	ers), and other enclosed storage and of emissions to 5 percent opacity?ollector exhaust points was the loading loading rate, or at least at the minimular operation controlled by the silo dust estions 4 a) and 4 b) below. If answe	d 9 (Ref : Chapter	
(check ☑ appropriat Stack Emissions 1 Were visible emiss 62-297, F.A.C.)?- 2 Are emissions from controlled to the emissions from the emissions are emissions. The emissions from the	sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust cooresentative of the normal silo unachievable in practice? the weigh hopper (batcher) "Yes", then continue on to quand continue on to question 5 ng operation in operation during	ers), and other enclosed storage and of the emissions to 5 percent opacity?	d 9 (Ref : Chapter	
(check ☑ appropriat Stack Emissions 1 Were visible emiss 62-297, F.A.C.)?- 2 Are emissions from controlled to the electric at a rate that is repunless such rate is 4 Are emissions from to this question is skip 4 a) and 4 b) a) Was the batchin b) During the visible duration?	sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust concesentative of the normal silo unachievable in practice?	ers), and other enclosed storage and of the emissions to 5 percent opacity?	d 9 (Ref : Chapter	
(check ☑ appropriate Stack Emissions 1 Were visible emissions from controlled to the edge of the ed	sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust cooresentative of the normal silo unachievable in practice?	ers), and other enclosed storage and of the emissions to 5 percent opacity?	d 9 (Ref : Chapter	
(check ☑ appropriat Stack Emissions 1 Were visible emiss 62-297, F.A.C.)?- 2 Are emissions from controlled to the e 3 During visible em at a rate that is repunless such rate is 4. Are emissions from to this question is skip 4 a) and 4 b) a) Was the batchi b) During the visiduration? 5. If emissions from from the silo dust	sions tests conducted during the silos, weigh hoppers (batche xtent necessary to limit visible issions tests of the silo dust cooresentative of the normal silo unachievable in practice?	ers), and other enclosed storage and of the emissions to 5 percent opacity? llector exhaust points was the loadin loading rate, or at least at the minimum operation controlled by the silo dust the estions 4 a) and 4 b) below. If answe has the visible emissions test?	d 9 (Ref : Chapter	

PART II: TESTING/RECORDKEEPING REQUIREMENTS - Rule 62-296.414, F.A.C (continued)				
(check ☑ appropriate box(es)				
Compliance Demonstration (Puls 62 206 401/5)(i) F A C)				
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.) 1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the				
annual compliance demonstration? (Rule 62-297 310(7)(a), F.A.C.)				
annual compitation (Rule 02-25) 510(1)(a), 1 54(5)	⊠163 <u></u> 140			
New Facilities - (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)				
2 Did this facility demonstrate:				
a) initial compliance no later than 30 days after beginning operation?	□Yes □ No			
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form				
submittal date?	□Yes □ No			
Friedla T-302- (
Existing Facilities – (permitted pursuant to Rule 62-210 300(4), F.A.C., Air General Permits)				
3 In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior t the AGP Notification form submission, and within 60 days prior to each anniversary date?				
the AGI Politication form submission, and within 60 days prior to each animversary date:				
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)				
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after t	the			
test was completed?	⊠Yes □ No

PART III: OPERATING/RECORDKEEPING REQUIREMENTS - Rule 62-296.414(2)(a) and (b), F.A.C. (continued) (check ☐ appropriate box(es))				
Unconfined Emissions - (Rule 62-296 320(4)(c), F.A.C.) 1. Does the owner operator of the concrete batching plant take reasonable precautions to control unconfined emissions by: a) management of roads, parking areas, stock piles, and yards, which shall include one or more of the following: 1) paving and maintenance of roads, parking areas, stock piles, and yards?				
2) application of water or environmentally safe dust-suppressant chemicals when necessary to control emissions?				
PART IV: SPECIAL CONDITIONS AND PROCEDURES A. New or Modified Process Equipment	- Rule 62-210.300(4)(d)4., F.A.C.			
1. Since the last inspection has there been a) installation of any new process equipment?				
FRANK DELGADO	8/14/06			
Inspector's Name (Please Print)	Date of Inspection 8/07			
Inspector's Signature	Approximate Date of Next Inspection			

COMMENTS: BILL ARLINGTON CONDUCTED VISIBLE EMISSIONS TESTS ON SIX (6) EMISSIONS POINTS I DID NOT OBSERVE ANY VISIBLE EMISSIONS OR FUGITIVE PARTICULATES FROM THE FACILITY.
