|--|-----------------|--------|
|  |                 |        |
| 1. Is there <b>Continuous Emissions Monitoring System</b> (CEMS) equipment installed on each unit to record to   |                 |        |
| primary and secondary chambers where there is a 1.0 second gas residence time in the secondary chamber co        |                 |        |
| accordance with the manufacturer's instructions?   |                 | ☐ No   |
| a) Do temperature probes seem to be properly placed?   | $\boxtimes$ Yes | ☐ No   |
| b) Are the following records kept on file, available for inspection for at least two years following the rec     | cording o       | f such |
| measurements, maintenance, reports and records?  |                 |        |
| 1) All measurements (including CEMS)   | $\boxtimes$ Yes | ☐ No   |
| 2) Monitoring device   | ⊠Yes            | ☐ No   |
| 3) Performance Testing Measurements  | ⊠Yes            | ☐ No   |
| 4) CEMS Performance Evaluation   | ⊠Yes            | ☐ No   |
| 5) All CEMS or monitoring device calibration checks  | Yes             | ☐ No   |
| 6) Adjustments   |                 | □ No   |
| 7) Preventive maintenance performed on systems/devices   |                 | ☐ No   |
| 8) Corrective maintenance performed on systems/devices   |                 | □ No   |
| 2. Was this crematory unit constructed: (check only one ☑ box)   |                 | _      |
| a) BEFORE August 30, 1989? (If this box checked, continue on to #3 and skip #4)                                  |                 |        |
| b) ON or AFTER August 30, 1989? (If this box checked, skip #3 and continue on to #4)                             |                 |        |
| 3. If constructed <b>BEFORE</b> August 30, 1989 is the:  |                 |        |
| a) secondary chamber combustion zone providing at least a 1.0 second gas residence time @ <b>1600°F</b> ?        | Yes             | □ No   |
| b) actual operating temperature of the secondary chamber combustion zone no less than <b>1400°F</b>              |                 |        |
| throughout the combustion process in the primary chamber?  | Yes             | □ No   |
| c) cremation in the primary chamber begun after the secondary chamber combustion zone temperature                |                 |        |
| is equal to or greater than 1400°F?  | Yes             | ☐ No   |
| d) required monitoring equipment installed and operational, and providing continuous monitoring to               |                 |        |
| record the temperature at the point or beyond where 1.0 second gas residence time is obtained in the             |                 |        |
| secondary chamber combustion zone according to the manufacturer's instructions?                                  | Yes             | □ No   |
| 4. If constructed <b>ON</b> or <b>AFTER</b> August 30, 1989 is the:  | штев            |        |
| a) volume in the secondary combustion zone sufficient to provide at least a 1.0 second gas residence time.       | ne.             |        |
| @ 1800° F?   | ⊠Yes            | □ No   |
| b) the actual operating temperature of the secondary chamber combustion zone no less than 1600°F                 | <u> </u>        |        |
| throughout the combustion process in the primary chamber?  | ⊠Yes            | □ No   |
| c) secondary chamber combustion zone temperature equal to or greater than 1600°F before the cremation            |                 | 110    |
| process begins in the primary chamber?   |                 | □ No   |
| 5. Are appropriate leak-proof containers containing no more than 0.5 % (percent) by weight chlorinated           | <u> </u>        | 110    |
| plastics used during the cremation of dead animals?  | <b>∑</b> Ves    | □ No   |
| a) If the answer to question 4 above is YES, is certifying documentation from the manufacturer that the          | <u> </u>        | 110    |
| are composed of 0.5% or less by weight chlorinated plastics kept on file at the site for the duration of         | <i>!</i><br>:   |        |
| their use and for at least two years after their use?  | ⊠Yes            | □ No   |
| b) If plastic bags are used for the cremation of animals are they non-chlorinated and no less than 3 mils        |                 |        |
| thick?   | ⊠Yes            | □ No   |
| c) Are dead animals, which have been used for medical or commercial experimentation, or other                    | ∐ i es          | ∐ No   |
| · · · · · · · · · · · · · · · · · · ·  | □Yes            | ⊠ No   |
| materials, including biomedical wastes (Rule 62-210.200, F.A.C.), incinerated at this location?                  |                 | =      |
| 6. During this review period, was the largest batch load cremated 500 pounds per hour or less?                   | ⊠Yes            | ∐ No   |
| 7. Have all crematory operators been trained and certified by a Department-approved training program?            | ⊠Yes            | ∐ No   |
| a) Are copies of the training certificates all crematory operators kept on file at the facility for the duration |                 | □ NT.  |
| of the operator's employment & for an additional two years after termination of employment?                      | $\boxtimes$ Yes | ☐ No   |

| PART IV: SPECIAL CONDITIONS AND PROCEDURES  | - Rule 62-296.401, F.A.C.    |           |     |
|---|------------------------------|-----------|-----|

**COMMENTS:** EU003 had an opacity of 0%. The unit was charged with a 60 pound animal. The Fluke meter used to test the thermocouple, digital panel reading, and the strip chart readings: The fluke meter reading was 1662 degree F. The digital panel reading was 1672 degree F. The strip chart recorder reading was 1674 degree F.Bill Rhodes conducted the Fuluke meter readings. The facilty appears to be in compliance with their permit conditions at this time.
