

CONCRETE BATCHING PLANT

COMPLIANCE INSPECTION CHECKLIST

INSPECTION TYPE: ANNUAL (INS1, INS2) COMPLAINT/DISCOVERY (CI)			
RE-INSPECTION (FUI) ARMS COMPLAINT NO:			
AIRS ID#: 0951267 DATE: <u>1/15/09</u> ARRIVE: <u>1:15 PM</u> DEPART: <u>2:05 PM</u>			
FACILITY NAME: S&L MATERIALS			
FACILITY LOCATION: 28001 SR 520			
CHRISTMAS 32709-8681			
OWNER/AUTHORIZED REPRESENTATIVE: Tama Davis PHONE: (407)870-0066			
CONTACT NAME: Corey Myers PHONE: (407)568-3709			
ENTITLEMENT PERIOD: 3/3/2007 / 3/3/2012 (effective date) (end date)			
PART I: <u>INSPECTION</u> <u>COMPLIANCE</u> <u>STATUS</u> (check ✓ only one box)			
☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE			
PART II: TESTING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414, F.A.C. (check ☑ appropriate box(es))			
Stack Emissions 1. Were visible emissions tests conducted during this site visit according to EPA Method 9 (Ref.: Chapter 62-297, F.A.C.)? No			
2. Are emissions from silos, weigh hoppers (batchers), and other enclosed storage and conveying equipment controlled to the extent necessary to limit visible emissions to 5 percent opacity? Yes No			
3. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo conducted			
at a rate that is representative of the normal silo loading rate, or at least at the minimum 25 tons per hour rate, unless such rate is unachievable in practice?			
4. Are emissions from the weigh hopper (batcher) operation controlled by the silo dust collector? (If answer to this question is "Yes", then continue on to questions 4.a) and 4.b) below. If answer is "No" then			
skip 4.a) and 4.b) and continue on to question 5.)			
b) During the visible emissions test, was the batching rate representative of the normal batching rate and duration?\infty Yes \subseteq No			
5. If emissions from the weigh hopper (batcher) operation are controlled by a dust collector, which is separate from the silo dust collector, are the visible emissions tests of the weigh hopper (batcher) dust collector			
conducted while batching at a rate that is representative of the normal batching rate and duration? Yes No			

PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued) (check ☑ appropriate box(es)			
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.) 1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of t annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)			
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 2. Did this facility demonstrate: a) initial compliance no later than 30 days after beginning operation? b) annual compliance within 60 days prior to each anniversary of the air general permit notification form submittal date?	☐Yes ☐ No		
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits) 3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior the AGP Notification form submission, and within 60 days prior to each anniversary date?			
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.) 4. Was the required test report filed with the department as soon as practical, but no later than 45 days after test was completed?			
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check ☑ appropriate box(es))			
	le 🗌		
 (check appropriate box(es)) Is this facility: 1) a stationary ; 2) a relocatable ; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check only one box.</i>) If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d), below.)	ing		
 (check ☑ appropriate box(es)) Is this facility: 1) a stationary ☑; 2) a relocatable ☐; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check ☑ only one box.</i>) If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d), below.)	ing ☐Yes ☑ No ☐Yes ☐ No		

PART III: OPERATING/RECORDKEEPING REQUIREMENTS - Rule 62-296.414(2)(a) and (b), F.A.C. (continued)				
(check ☑ appropriate box(es))				
(check ☑ appropriate box(es)) Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.) 1. Does the owner /operator of the concrete batching plant take re emissions by: a) management of roads, parking areas, stock piles, and yard: 1) paving and maintenance of roads, parking areas, stock 2) application of water or environmentally safe dust-supp emissions? 3) removal of particulate matter from roads and other pav re-entrainment, and from building or work areas to red 4) reduction of stock pile height, or installation of wind b particulate matter from stock piles?	ed areas under control of the owner/operato uce airborne particulate matter?			
PART IV: SPECIAL CONDITIONS AND PROCEDURES – Rule A. New or Modified Process Equipment 1. Since the last inspection has there been a) installation of any new process equipment?		∐Yes ⊠ No		
b) alterations to existing process equipment without replacement?				
local program office?		□Yes □ No		
Norma Ali	1/15/09			
Inspector's Name (Please Print)	Date of Inspection	_		
	1/15/10			
Inspector's Signature	Approximate Date of Next Inspection	_		

COMMENTS: Norma Ali met with Bruno Ferraro, Grove's Scientific consultant and Corey Myers, Operations Manager. This compliance test was conducted for a pugmill at this facility. The pugmill is located southeast of the old plant on the same property. This soil cement plant mixes sand with cement to form a road-based material. The 70,000 pound mixture is batched into dump trucks to be hauled off to road projects. The loading rate for the cement silo was 26.57 TPH. The opacity observed was 0%. The facility appears to be in compliance with the permit requirements at this time.
