<p><b>Kent Bottorf, consultant for Raney Building Materials, submitted the visible emissions test report within 45 days. The test report shows no visible emissions were observed. The tanker took 52 minutes at 5 to 8 psi to load 25.50 tons of cement into the silo, which equals 29.42 tons per hour. The loading rate is acceptable and facility appeared to be in compliance at the time of inspection with the air general permit.</b></p>
