

## CONCRETE BATCHING PLANT

## COMPLIANCE INSPECTION CHECKLIST

RE-INSPECTION (FUI) ARMS COMPLAINT NO:
AIRS ID#: 7775238 DATE: <u>6/16/09</u> ARRIVE: <u>2:32 PM</u> DEPART: <u>2:40 PM</u>
FACILITY NAME: FT WALTON BEACH CONCRETE PLANT
FACILITY LOCATION: 1771 FIM Blvd
FORT WALTON BEACH 32549
OWNER/AUTHORIZED REPRESENTATIVE: JAMES FORBES PHONE: (678)746-2295
CONTACT NAME: Jonathon Walden, Maintenance PHONE:
<b>ENTITLEMENT PERIOD:</b> 9/16/2005 / 9/16/2010
(effective date) (end date)
PART I: INSPECTION COMPLIANCE STATUS (check ☑ only one box)
☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE
DADT H. TESTING/DECODD/JEDING DECHIDEMENTS Dula 62 206 414 E A C
PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. (check ☑ appropriate box(es))
Stack Emissions
1. Were visible emissions tests conducted during this site visit according to EPA Method 9 (Ref.: Chapter 62-297, F.A.C.)?
2. Are emissions from silos, weigh hoppers (batchers), and other enclosed storage and conveying equipment
controlled to the extent necessary to limit visible emissions to 5 percent opacity?
controlled to the extent necessary to limit visible emissions to 5 percent opacity?  3. During visible emissions tests of the silo dust collector exhaust points was the loading of the silo conducted at a rate that is representative of the normal silo loading rate, or at least at the minimum 25 tons per hour rate, unless such rate is unachievable in practice?
controlled to the extent necessary to limit visible emissions to 5 percent opacity?
controlled to the extent necessary to limit visible emissions to 5 percent opacity?
controlled to the extent necessary to limit visible emissions to 5 percent opacity?
controlled to the extent necessary to limit visible emissions to 5 percent opacity?
controlled to the extent necessary to limit visible emissions to 5 percent opacity?

PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued) (check ☑ appropriate box(es)	
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)  1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of the annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)	□ No
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)  2. Did this facility demonstrate:  a) initial compliance no later than 30 days after beginning operation?	
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)  3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to the AGP Notification form submission, and within 60 days prior to each anniversary date?  Yes	□ No
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)  4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the test was completed?	□No
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check 🗹 appropriate box(es))	
<ol> <li>(check ☑ appropriate box(es))</li> <li>Is this facility: 1) a stationary ☐; 2) a relocatable ☒; or does it have: 3) both, stationary and relocatable ☐ concrete batching and/or nonmetallic mineral processing plants? (<i>Please check ☑ only one box.</i>)</li> <li>If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d), below.)————————————————————————————————————</li></ol>	No No No No No

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-296.414(2)(a) and (b), F.A.C. (continued) (check ☑ appropriate box(es))			
<ul> <li>Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.)</li> <li>Does the owner /operator of the concrete batching plant take reasonable precautions to control unconfined emissions by:</li> </ul>			
a) management of roads, parking areas, stock piles, and yards, which shall include one or more of the following:  1) paving and maintenance of roads, parking areas, stock piles, and yards?			
3) removal of particulate matter from roads and other paved areas under control of the owner/operator to re-entrainment, and from building or work areas to reduce airborne particulate matter?			
b) use of spray bar, chute, or partial enclosure to mitigate emissions at the drop point to the truck? \overline{\times} Yes \overline{\to} No			
PART IV: <u>SPECIAL CONDITIONS AND PROCEDURES</u> – Rule 62-210.300(4)(d)4., F.A.C. A. <u>New or Modified Process Equipment</u>			
1. Since the last inspection has there been  a) installation of any new process equipment?  b) alterations to existing process equipment without replacement?  Yes No			
c) replacement of existing equipment substantially different than that noted on the most recent notification form?			
d) If you answered <u>YES</u> to any of the above, did the owner submit a new and complete notification form and appropriate fee (Rule 62-4.050, FAC) to the appropriate DEP or local program office?   Yes  No

Inspector's Signature	Approximate Date of Next Inspection		
COMMENTS: Department personnel conducted an unannounced	annual air program compliance inspection on June 16, 2009 at		

**COMMENTS:** Department personnel conducted an unannounced annual air program compliance inspection on June 16, 2009 at the Lafarge relocatable facility currently located in Okaloosa County. Mr. Jonathon Walden, maintenance personnel, was present to assist during the inspection.

The facility has not commercially operated since February 8, 2008. The silo was loaded on July 7, 2008 for the annual visible emissions (VE) test which was conducted by H,S&E Resources, Inc. No emissions were observed during the 30-minute test. The test results submitted to the Department did not indicate, as required, whether the batching operation was active during the test. Please note that future test reports should include this information. See Rule 62-296.414(3)(c), Florida Administrative Code. On June 23, 2009, the Department received an e-mail from the Environmental Manager for Lafarge, Mr. Robert Eaton. Mr. Eaton explained that, due to the economic downturn, the plant has not commercially operated since February 8, 2008 and it is uncertain when the plant will operate again. Mr. Eaton requested a waiver of the annual VE test for 2009. The Department has agreed not to pursue enforcement if a VE test is not performed during the longterm inoperation of the facility; however, please note that prior to recommencing operation of the facility, a VE test shall be completed.

During the inspection, facility personnel were on site unloading the silos of their materials to be taken to another facility. There are two storage silos on site, one for cement and one for flyash. Particulate emissions are controlled by a single dust collector for the silos and truck batching process. The drop point where the trucks load the concrete also has a partial enclosure.

The yard is paved to help control fugitive emissions and speed limit signs were also posted at the entrance. To help control fugitive emissions, stockpiled materials are surrounded by walls on three sides and a sprinkler system is installed to wet the materials.
