COMMENTS: Temp shutdown letter received 5-18-10. When was op. resumed?
During 08 test, two baghouses were tested. Following test, A Southwest is going to lease the property to A Plus Concrete, who will be the operator. Take 8" dia silo labeled for flyash. Short fat silo labeled for cement. During VE test it could not be conducted due to leak around baghouse. Neither EU has been run in a year prior to start of test. Maintenance needs to be performed on both EUs prior to testing and resuming regular operation. The annual VE test will be rescheduled.
