O&M Plan

The pollution control equipment shall be operated and maintained in accordance to the operation and maintenance (O&M) plan. The O&M plan shall include, but is not limited to:

- (1) Operating parameters of the pollution control device;
- (2) Time table for the routine maintenance of the pollution control device as specified by the manufacturer;
- (3) Time table for routine periodic observations of the pollution control device sufficient to ensure proper operation;
- (4) A list of the type and quantity of the required spare parts for the pollution control device which are stored on the premises of the permit applicant;
- (5) A record log which will indicate, at a minimum:
 - a. When maintenance and observations were performed;
 - b. What maintenance and observations were performed; and
 - c. Who performed said maintenance and observations.
 - d. Acceptable parameter ranges for each operational check.

[Pinellas County Code, Subsection 58-128]

Comments: Reviewed records for the months of 9/1/12 through 8/31/13. See attached O&M log sheets.

The monthly inspection was not performed for several months and was not recorded on the monthly log record. Mr. Tim Schult stated he performed monthly inspection, but forgot to record it in the monthly inspection log record. Some items that were not inspected monthly were inspected during pneumatic loading of the silo inspection. The emission unit maintenance log was missing the year

the maintenance was performed. I gave Mr. Schuldt a verbal warning. I explained to Mr. Schuldt that he needed to maintain record log in accordance with the O&M plan.

Exit Interview:*I informed Mr. Schuldt he needed to perform and record monthly inspection in the log record and to make sure the maintenance log shows the year when maintenance was perform on the emission unit.*

He promised to make corrections to the log record ASAP.
