**COMMENTS:** A complaint investigation was conducted on Friday, May 5, 2006 after a phone call from a concerned citizen was received on 5/4/06. The complainant described the problem as a "heavy dust problem from concrete crusher behind their property". Ms. Jodi Dittell and John Kasper, both with EPD, conducted the investigation. No unconfined emissions were observed leaving the property. The crusher was operating at the time of the inspection and no visible emissions were observed coming from the operations. Fugitive emissions were observed on the roadway from the heavy traffic going to and from the facility but the emissions were not leaving the property. The inspectors spoke with Mr. Hument Crust, CH&E personnel, and told him to water the roadway. He was in the process of filling up the water truck when the inspectors were leaving.
