I ran the total of our product useage from 10/01/09 - 09/31/10. This will begin from the last point reported and go forward from there 12 months. Our prior records have been run during that time frame... coincident with the original air permit timing.

The total useage durint that time of resin & gel coat (I've also included catalyst and mold release liquids) is:

13,864.00 pounds or 27.72 Drums of these materials combined.

Let me know if you need anything further.

Thank you.

Elizabeth (Lisa) Shinham
Vice President
Wave Zone, Inc.
