Re: Charlotte County -AG
Tarmac America LLC
Facility ID No. 0150084

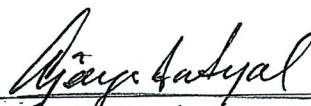

Dear Mr. Folsom:

On July 29, 2011 an inspector from the Department was at the above referenced facility to witness a compliance test. During the compliance test the inspector noted that your cement silo was sporadically emitting visible emissions from the cement silo exhaust line located before the baghouse. Since the visible emissions were sporadic, a six minute opacity average wasn't calculated.

The Department would like to advise you that allowing this type of emission may constitute circumvention, a violation of Rule 62-210.650, Florida Administration Code (F.A.C.). The rule states no person shall circumvent any air pollution control device or allow the emission of air pollution without the applicable air pollution control device operating properly.

The Department request that the exhaust line be repaired within thirty days of this letter. Please inform the Department with documentation that the repairs have been made. The information may be mailed to the address mentioned in the letter head or emailed to Sherrill.Culliver@dep.state.fl.us. Should you have any questions please call Sherrill Culliver at (239) 344-5629.

Sincerely,

Ajaya K. Satyal
Program Administrator
Air Resource Management
