COMMENTS: The Inspector Norma Ali, met with Jeff Woody, Batch Plant and Matt Welborn to audit the annual compliance test on EU 005. Product was loaded from silo to West truss bin. Opacity observed was zero percent. The process took 17 minutes.

At the time of inspection, a tanker was loading cement to one of the silos, inspector noticed that the hose from the tanker to the hook up part of the silo was cracked and dust was coming out from the hose. Matt Welborn mentioned to Mr. Woody, who tried to make a improvised repair and the tanker driver was adding water to that part of the hose, to prevent dust to fly. Inspector requested to Mr. Woody to repair or replace that hose as soon as possible, to prevent a greater leakage. Mr. Woody said he was going to fix it. The yard is paved. No objectionable odors or dust leaving the property was observed.
