COMMENTS: Assefa Hailemariam, inspector from OCEPD, met with Zachary Beatty of Beatty Environmental Services, LLC, and Steve Ellis facility representative on December 2, 2013, at 1406 Atlanta Ave., Orlando, Florida 32806 to audit the visible emission test on five emission units. The emission units tested were EU001, EU004, EU005, EU006 and EU007. It should be noted that emission unit EU007 was not tested and not required to do the test and also did not see any fugitive emission coming out of the EU007during the inspection. It should be noted that emission unit EU001 was tested for about 25 minutes before the silo was full. The facility has not been operating for the last few months due to slow business. All emission units tested had an observed opacity of zero percent and loading rates were acceptable. No objectionable odors were detected. No PM was observed leaving the property during the compliance test. A water truck was on site applying water to the roads during the inspection.
