PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued) (check ☑ appropriate box(es)	
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)  1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of t annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)	
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)  2. Did this facility demonstrate:  a) initial compliance no later than 30 days after beginning operation?  b) annual compliance within 60 days prior to each anniversary of the air general permit notification form submittal date?	□Yes □ No n - □Yes □ No
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)  3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior the AGP Notification form submission, and within 60 days prior to each anniversary date?	
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)  4. Was the required test report filed with the department as soon as practical, but no later than 45 days after test was completed?	
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check ☑ appropriate box(es))	
	le 🗌
<ol> <li>(check ☑ appropriate box(es))</li> <li>Is this facility: 1) a stationary ☑; 2) a relocatable ☐; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (<i>Please check ☑ only one box.</i>)</li> <li>If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (<i>If your answer to this question is YES</i>, then proceed to questions 2.a), thru 2.d), below.)</li></ol>	ing □Yes ⊠ No □Yes □ No
<ol> <li>(check ☑ appropriate box(es))</li> <li>Is this facility: 1) a stationary ☑; 2) a relocatable ☐; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? PART III: OPERATING/RECORDKEEPING REQUIREME (check ☑ appropriate box(es))	NTS – Rule 62-296.414(2)(a) and (b), F.A.C.	(continued)
Unconfined Emissions – (Rule 62-296.320(4)(c), F.A.C.)  1. Does the owner /operator of the concrete batching plant take emissions by:  a) management of roads, parking areas, stock piles, and y  1) paving and maintenance of roads, parking areas, stock piles, and y  2) application of water or environmentally safe dust-semissions?	rards, which shall include one or more of the force piles, and yards? uppressant chemicals when necessary to controly paved areas under control of the owner/operator reduce airborne particulate matter?	☐ Yes       ☒ No         I       ☐ Yes       ☒ No         II       ☐ Yes       ☒ No         III       ☐ Yes       ☒ No         ☒ Yes       ☒ No
PART IV: SPECIAL CONDITIONS AND PROCEDURES – A. New or Modified Process Equipment	Rule 62-210.300(4)(d)4., F.A.C.	
1. Since the last inspection has there been  a) installation of any new process equipment?		
Debbie Telemeco-Anders, ESII	04/18/2007	
Inspector's Name (Please Print)	Date of Inspection ~ 2008	_
Inspector's Signature	Approximate Date of Next Inspection	_

**COMMENTS:** Debbie Telemeco-Anders did an INS3 of the facility; witnessed the visible emissions compliance test of the truck unloading 26.74 tons cement at >25 tph (~8:31 am - 9:17 am). Filling took place at > 10 psi: tanker was loading at 12.5 psi. The silo was overfilled, emissions from the top of the silo were visible at >5% opacity. The facility constructed an enclosure/metal shroud around the drop sock to control emissions from this EU. It was not effective at the time of this inspection. The ground area was NOT cleared/debris remained/ fugitive particulate cloud as vehicle drove over the yard area. H2O was applied to the stockpiles.
