

CONCRETE BATCHING PLANT

COMPLIANCE INSPECTION CHECKLIST

RE-INSPECTION (FUI) ARMS COMPLAINT NO:			
AIRS ID#: 1050382 DATE: <u>05/15/2009</u> ARRIVE: <u>9:57am</u> DEPART: <u>11:11 am</u>			
FACILITY NAME: PRESTIGE READY MIXLAKELAND YARD			
FACILITY LOCATION: 4140 SOUTHSIDE FRONTAGE RD			
LAKELAND 33815-3241			
OWNER/AUTHORIZED REPRESENTATIVE: MICHAEL MAHONEY PHONE: (561)478-9980			
CONTACT NAME: Joe Lucia PHONE: (813)918-3489			
ENTITLEMENT PERIOD: 1/17/2008 / 1/17/2013			
(effective date) (end date)			
PART I: INSPECTION COMPLIANCE STATUS (check only one box)			
☐ IN COMPLIANCE ☐ MINOR Non-COMPLIANCE ☐ SIGNIFICANT Non-COMPLIANCE			
PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. (check ☑ appropriate box(es))			
Stack Emissions			
1. Were visible emissions tests conducted during this site visit according to EPA Method 9 (Ref.: Chapter 62-297, F.A.C.)?			
2. Are emissions from silos, weigh hoppers (batchers), and other enclosed storage and conveying equipment			
2. The companies from strost, weight inoppers (ductions), and other enclosed storage and conveying equipment			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			
controlled to the extent necessary to limit visible emissions to 5 percent opacity?			

PART II: <u>TESTING/RECORDKEEPING REQUIREMENTS</u> – Rule 62-296.414, F.A.C. – (continued) (check ☑ appropriate box(es)			
Compliance Demonstration - (Rule 62-296.401(5)(i), F.A.C.)			
1. Is each dust collector exhaust point tested according to the visible emissions limiting standard as part of t	he		
annual compliance demonstration? (Rule 62-297.310(7)(a), F.A.C.)			
New Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)			
2. Did this facility demonstrate:			
a) initial compliance no later than 30 days after beginning operation?	□Yes □ No		
b) annual compliance within 60 days prior to each anniversary of the air general permit notification form			
submittal date?			
Submitted date.			
Existing Facilities – (permitted pursuant to Rule 62-210.300(4), F.A.C., Air General Permits)			
3. In order to demonstrate annual compliance, was an annual visible emissions test conducted 60days prior to	to		
the AGP Notification form submission, and within 60 days prior to each anniversary date?	⊠Yes □ No		
the AOI Notification form submission, and within 60 days prior to each anniversary date.			
Test Reports – (Rules 62-213.440, F.A.C. and 62-297.310(8)(b), F.A.C.)			
4. Was the required test report filed with the department as soon as practical, but no later than 45 days after	tha		
test was completed?			
test was completed:	LIES LINO		
PART III: OPERATING/RECORDKEEPING REOUIREMENTS – Rule 62-210.300(4)(c)2 F.A.C.			
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check 🗹 appropriate box(es))			
PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C. (check ☑ appropriate box(es))

Inspector's Signature	Approximate Date of Next Inspection	-	

COMMENTS: Pre-inspection: According to ARM's and facility files, this facility seems to be in compliance with its current entitlement. The last VE testing was conducted on 5/1/08. This facility has one EU, a cement silo with silo top dust collector. I attempted an inspection at this facility in November of 2008, but no one was at the site. Inspection Findings: Mr. Joe Lucia answered checklist questions. Mr. Lucia is the only person who operates out of this location. The site is a remote truck loading station that does not have any mixing capabilities. The yard is unpaved, and is in a location that is surrounded by large trees and thick vegetation. Mr. Lucia stated that the Belgrade silo at this facility is only used a couple times a week. There are no sprinklers at this facility and the large piles are kept under an awning that is enclosed overhead and on the backside. A front end loader is used to fill trucks with soil from piles. No photos were taken during my visit at this site because photos were taken during my first inspection attempt at this facility in November of 2008. Visible Emissions (VE) testing was conducted during my visit at this site. I witnessed the beginning of silo loading and the VE test in its entirety, but did not witness the end portion of silo loading. The facility did provide a copy of the cement truck's delivery ticket and it is attached to this inspection report. During my discussion with Mr. Lucia, he stated there are no emissions from the loading of trucks at this site because the silo has a square metal plate that fits over the opening of the truck and the particulate that rises from the loading of the truck is recycled back into the silo.
