**COMMENTS:** This facility has two Union L-880 perc machines constructed in 2005. Machine #1 (furthest to the back) was found to show ambient emissions from the back around the button trap area. According to the owner, he plans to replace the seal of the button trap. The Air Calendar was missing information of the last month's purchase. However, copies of the original receipts were provided and reviewed. This facility used the TIF XL-1A leak detector.
